## Open Recommendations Made to the Board of Governors of the Federal Reserve System

## Office of Inspector General

Board of Governors of the Federal Reserve System Bureau of Consumer Financial Protection

We oversee the Board of Governors of the Federal Reserve System by conducting audits, evaluations, and inspections of the Board's programs and operations and by making recommendations to improve economy, efficiency, and effectiveness.

Audits assess aspects of the economy, efficiency, and effectiveness of Board programs and operations and are conducted in accordance with *Government Auditing Standards*, which is issued by the comptroller general of the United States. Evaluations and inspections include program evaluations and statutorily mandated reviews of failed financial institutions supervised by the Board. Evaluations are generally focused on the effectiveness of specific programs or functions, and inspections are often narrowly focused on particular issues or topics and provide time-critical analyses. Evaluations and inspections are performed according to *Quality Standards for Inspection and Evaluation*, which is issued by the Council of the Inspectors General on Integrity and Efficiency.

Our audit, evaluation, and inspection reports explain why we conducted the review and the issues we found that should be corrected or improved, and they contain specific recommendations for agency corrective action. Table 1 shows, as of September 30, 2021, the total number and status of recommendations we made to the Board by calendar year, beginning with the first year for which recommendations remain open.
