

AmeriCorps

OFFICE OF INSPECTOR GENERAL

AUDIT OF AMERICORPS' FISCAL YEAR 2021 NATIONAL SERVICE TRUST FUND FINANCIAL STATEMENTS

OIG Report 22-02

Prepared by:

CliftonLarsonAllen LLP
901 North Glebe Road, Suite 200
Arlington, VA 22203

OFFICE OF INSPECTOR GENERAL

November 15, 2021

MEMORANDUM TO: Malcom Coles
Acting Chief Executive Officer

FROM: Monique P. Colter /s/
Assistant Inspector General for Audit

SUBJECT: Audit of AmeriCorps' Fiscal Year 2021 National Service Trust Fund
Financial Statement, OIG Report 22-02

We contracted with the independent certified public accounting firm of CliftonLarsonAllen LLP (CLA) to audit AmeriCorps' National Service Trust Fund financial statements (Trust financial statements) as of September 30, 2021, and for the year then ended. The contract required that the audit be performed in accordance with the United States generally accepted government auditing standards and applicable Office of Management Budget audit guidance. In its audit of the fiscal year 2021 Trust financial statements, CLA reported:

- **Disclaimer of Opinion:** AmeriCorps requested that the Trust Service Award Liability and related accounts in the financial statement be excluded from the FY 2021 financial statement audit. AmeriCorps also stated that that Trust Obligation and Liabilities would not be available to be audited until the close of the third quarter. In addition, AmeriCorps was unable to provide sufficient appropriate evidence on a significant number of transactions and account balances due to inadequate processes and controls to support transactions and estimates, and the ongoing remediation efforts from prior year findings.
- **Four material weaknesses and one significant deficiency** in the Trust's internal control over financial reporting. CLA reported the following deficiencies in the areas below as material weaknesses and one significant deficiency, Information Technology Security Controls (Modified Repeat):
 - Material Weaknesses:
 1. Migration to Shared Service- New
 2. Internal Controls Program (FMFIA)- Modified Repeat
 3. Financial System and Reporting- Modified Repeat
 4. Trust Obligations and Liability Model- Repeat

- CLA considered AmeriCorps' compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct effect on the determination of material financial statement amounts and disclosures. However, CLA was not able to perform the applicable tests of AmeriCorps' compliance due to the scope limitation and inability to obtain sufficient appropriate audit evidence to allow them to express an opinion on the financial statement.

Had CLA been able to obtain sufficient appropriate audit evidence to express an opinion on the Trust financial statements, other material weaknesses or significant deficiencies, or instances of noncompliance or other matters may have been identified and reported.

In connection with the contract, we reviewed CLA's report and related documentation and inquired of its representatives. Our review, as differentiated from an audit of the financial statements in accordance with the United States generally accepted government auditing standards, was not intended to enable us to express, and we do not express, an opinion on the Trust financial statements.

CLA is responsible for the attached independent auditors' report, dated November 12, 2021, and the conclusions expressed therein. However, our review disclosed no instances where CLA did not comply, in all material respects, with the United States generally accepted government auditing standards.

INDEPENDENT AUDITORS' REPORT

To the Acting Chief Executive Officer and Inspector General of
AmeriCorps

Report on the Financial Statement

We were engaged by the AmeriCorps Office of Inspector General (OIG) to audit the accompanying AmeriCorps National Service Trust Fund (Trust) financial statement, which comprise the balance sheet as of September 30, 2021; the related statements of net cost, changes in net position, and the combined statement of budgetary resources for the fiscal year then ended, and the related notes to the financial statement (referred to herein as financial statement).

Management's Responsibility

AmeriCorps management is responsible for the preparation and fair presentation of the financial statement in accordance with accounting principles generally accepted in the United States of America (U.S.); this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statement that is free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the financial statement based on conducting the audit in accordance with U.S. generally accepted auditing standards; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the U.S.; and Office of Management and Budget (OMB) Bulletin No. 21-04, *Audit Requirements for Federal Financial Statements* (OMB Bulletin 21-04). Because of the matters described in the Basis for Disclaimer of Opinion below, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

AmeriCorps requested that Trust Service Award Liability and related accounts in the financial statement be excluded from the FY 2021 financial statement audit and further stated that Trust Obligation and Liabilities would not be available for audit until after the close of the third quarter. These scope limitations were material to AmeriCorps' financial statement. In addition, AmeriCorps was unable to provide sufficient appropriate evidence on a significant number of transactions and account balances due to inadequate processes and controls to support transactions and estimates, and the ongoing remediation efforts of prior year findings.

Disclaimer of Opinion

Because of the significance of the matters described in the preceding paragraph, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on the fiscal year 2021 financial statement.

INDEPENDENT AUDITORS' REPORT (Continued)

Other Matter

Following discussions with the Office of Management and Budget (OMB) and Congressional stakeholders, AmeriCorps and the OIG agreed to forgo the audit of AmeriCorps' FY 2020 Trust financial statements. Forgoing the audit was intended to allow AmeriCorps to complete the actions necessary to prepare for the transition of its financial management services to a shared services provider in FY 2021. AmeriCorps acknowledged that, if its FY 2020 Trust financial statements were audited, the results would be the same as those in FY 2019; a disclaimer of opinion, three material weaknesses and substantially the same unimplemented recommendations. In FY 2020, AmeriCorps predicted that the move to shared services would resolve many of the material weaknesses identified in the FY 2019 Trust financial statement audit and before.

Report on Internal Control over Financial Reporting (Internal Control)

In connection with our engagement to audit AmeriCorps FY 2021 Trust financial statement, we considered AmeriCorps' internal control over financial reporting to determine the audit procedures that were appropriate in the circumstances for the purpose of expressing our opinion on the financial statement, but not for the purpose of expressing an opinion on the effectiveness of AmeriCorps' internal control. Accordingly, we do not express an opinion on the effectiveness of AmeriCorps' internal control. We did not test all internal controls relevant to operating objectives as broadly defined by the *Federal Managers' Financial Integrity Act of 1982* (FMFIA) nor did we test internal control on the financial statement line items and related processes that were excluded by AmeriCorps management from the scope of our audit.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies; therefore, material weaknesses or significant deficiencies may exist that have not been identified. However, as described [Exhibits A](#) and [B](#), we identified certain deficiencies in internal control that we consider to be material weaknesses and significant deficiency.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the financial statement will not be prevented or detected and corrected on a timely basis. We consider the deficiencies in the areas below and described in [Exhibit A](#) to be material weaknesses.

1. Migration to Shared Service (New)
2. Internal Controls Program (FMFIA)- (Modified Repeat)
3. Financial System and Reporting (Modified Repeat)

INDEPENDENT AUDITORS' REPORT (Continued)

Further, the scope limitations requested by AmeriCorps prevented us from performing audit procedures related to the previous Trust Obligations and Liability Model material weakness¹ and the Single Audit Act compliance. Accordingly, we continue to report the material weakness and noncompliance item and related recommendations as unimplemented. See Status of Prior Year Recommendations in [Exhibit C](#).

A significant deficiency is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies in the Information Technology Security Controls (Modified Repeat) described in [Exhibit B](#) to be a significant deficiency.

Had we been able to obtain sufficient appropriate audit evidence to express an opinion on the financial statement, other material weaknesses or significant deficiencies may have been identified and reported herein.

Report on Compliance with Laws, Regulations, Contracts, and Grant Agreements and Other Matters (Compliance)

In connection with our engagement to audit AmeriCorps' FY 2021 Trust financial statement, we considered AmeriCorps' compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct effect on the determination of material financial statement amounts and disclosures. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion.

We were not able to perform the applicable tests of AmeriCorps' compliance due to the aforementioned scope limitation and inability to obtain sufficient appropriate audit evidence to enable us to express an opinion on the financial statement.

Management's Responsibility for Internal Control and Compliance

AmeriCorps management is responsible for (1) maintaining effective internal control over financial reporting, including the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statement that are free from material misstatements, whether due to fraud or error, (2) providing a statement of assurance on the overall effectiveness on internal control over financial reporting, and (3) complying with laws, regulations, contracts, and grant agreements applicable to AmeriCorps.

Purpose of the Report on Internal Control and Report on Compliance

The purpose of the Report on Internal Control and on Compliance is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide

¹ [CNCS OIG Report 20-01, Audit of the Corporation for National and Community Service's Fiscal Year 2019 Consolidated Financial Statements, issued November 20, 2019](#). Although AmeriCorps did not undergo an audit of its financial statements in FY 2020, the agency acknowledged in its FY 2020 Annual Management Report that, if such an audit had been conducted, the results would have been the same as in FY 2019.

INDEPENDENT AUDITORS' REPORT (Continued)

an opinion on the effectiveness of AmeriCorps' internal control or compliance. These reports are an integral part of an audit performed in accordance with *Government Auditing Standards* in considering AmeriCorps' internal control and compliance. Accordingly, these reports are not suitable for any other purpose.

AmeriCorps' Response to Audit Findings and Recommendations

AmeriCorps did not express concurrence or nonoccurrence to our findings and recommendations. AmeriCorps' comments can be found in [Exhibit D](#). AmeriCorps' response was not subjected to the auditing procedures applied in the audit of the financial statement and, accordingly, we express no opinion on it.

EXHIBIT A
Material Weaknesses
FY 2021

1. Migration to Shared Service (New finding)

AmeriCorps' transition to a shared service platform offered by the Administrative Resource Center (ARC) within the U.S. Treasury Departments' Bureau of Fiscal Services (BFS), effective on October 1, 2020, created new challenges that affected AmeriCorps' ability to produce complete, adequate, and reliable financial information. The pre-migration general ledger account clean-up process spilled over into FY 2021 and was not complete as of the end of this year's audit fieldwork.

Also, AmeriCorps was not able to convert all of the transactions originally recorded in its Momentum legacy system to the reporting required by ARC's financial system, Oracle. Despite the migration to shared services, AmeriCorps elected to continue to conduct critical financial transactions relating to its core business in Momentum. Also, because Momentum is not configured to report object class codes² in accordance with Federal requirements, manual adjustments must be used to correct the issue after AmeriCorps reports this information from Momentum to ARC's Oracle financial system. That results in additional work and delays and introduces human error into the reporting process. In addition, there were misclassification issues caused by mapping inconsistencies in the program and fund structures within the two accounting systems. In most of these instances, AmeriCorps had to rely on post-conversion manual entries to temporarily fix the issues and meet financial reporting requirements. Total absolute values of manual entries significantly increase from \$4 billion (rounded) in FY 2019, to \$7 billion (rounded) in FY 2020, to \$13 billion (rounded) in FY 2021.

AmeriCorps was not prepared for the magnitude of the work required to ensure a successful conversion, because it did not conduct an effective or realistic risk assessment or planning to ensure that the conversion issues would not impede operations unduly. The agency did not have a plan to address unexpected issues prior to the actual conversion. AmeriCorps underestimated the level of resources needed for the conversion to proceed smoothly and completely and therefore under-resourced the effort, leading to ongoing financial accounting, reporting, and operation issues.

The Government Accountability Office's (GAO) Standard for Internal Control in the Federal Government (Green Book) states that changes in conditions affecting the entity and its environment often require changes to the entity's internal control system, as existing controls may not be effective for meeting objectives or addressing risks under changed conditions. Management should analyze the effect of identified changes on the internal control system and respond by revising the internal control system on a timely basis, when necessary, to maintain its effectiveness.³

² Object classes are categorized in a classification system that present *obligations by the items or services purchased by the Federal Government*.

³ <https://www.gao.gov/assets/gao-14-704g.pdf> page 43, 9.04

EXHIBIT A
Material Weaknesses
FY 2021

Further, changing conditions often prompt new risks or changes to existing risks that need to be assessed. As part of analyzing and responding to change, management performs a risk assessment to identify, analyze, and respond to any new risks prompted by the changes. Additionally, existing risks may require further assessment to determine whether the defined risk tolerances and risk responses need to be revised.⁴

We recommend that AmeriCorps:

1. Perform a risk assessment over the current state of the conversion to ARC and work jointly with ARC, senior leadership, Office of Chief Risk Officer, and functional groups affected by the risk to develop a mitigation strategy and execute a realistic and properly designed corrective action plan. **(New)**
2. Fix incorrect outstanding balances and missing data resulting from financial system configuration issues and ensure future interfaces with Oracle do not have the same issues. **(Modified Repeat)**
3. Continue coordinating with ARC to ensure that its accounting platform is compatible with AmeriCorps' operations and the type of accounting transactions that AmeriCorps processes. **(Modified Repeat)**
4. Conduct a review of transactions processed in Momentum and already migrated to Oracle through interface or reported in Oracle using journal entries, to ensure that correct object class codes were applied. **(New)**

2. Internal Controls Program (FMFIA) (modified repeat finding)

An effective system of internal control is necessary to provide reasonable assurance that a Federal entity conducts its programmatic activities effectively and efficiently, has a reliable financial reporting system and complies with applicable laws and regulations⁵. Without a fully functional internal controls program, AmeriCorps might not meet its financial, programmatic and compliance objectives. Establishing internal controls that meet Federal standards is a core responsibility of the management of a Federal agency, as required by the Federal Managers Financial Integrity Act of 1982 (FMFIA), OMB Circular No. A-123 and the GAO's *Standards for Internal Control in the Federal Government*.

AmeriCorps' internal control program remains ineffective, despite some areas of improvement. We note, for example, that the agency now has a formal, documented process for collecting and providing the Chief of Executive Officer (CEO) with comprehensive information to consider in deciding the level of assurance and substantive content of the required Annual Management

⁴ <https://www.gao.gov/assets/gao-14-704g.pdf>, page 43, 9.05

⁵ OMB Circular No. A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*, Policy section.

EXHIBIT A
Material Weaknesses
FY 2021

Report (AMR) statement concerning the effectiveness of internal control. In the AMR for FY 2021, AmeriCorps' CEO acknowledges the continuing deficiencies and provided a statement of no assurance as to effectiveness of internal control over financial reporting, operations, including of the agency's grant programs, and compliance.

AmeriCorps has made little progress at correcting the pervasive problems that have left the agency unable to obtain an opinion on its financial statements since FY 2017. All three material weaknesses that we identified in the Trust financial statement audit report were first reported in FY 2017. Only seven of the 37 recommendations from FY 2019 have been implemented. In most areas, AmeriCorps has not even developed meaningful corrective action plans (CAPs) to address the identified material weaknesses and significant deficiency. Until AmeriCorps can create and implement focus and well-resourced CAPs, it cannot expect to resolve these longstanding problems. To date, only the Office of the Chief Risk Officer (OCRO) has consistently developed and implemented effective CAPs, which has contributed to that office's track record of closing recommendations.

Below are some of the new and recurring deficiencies that we identified in the internal control program:

- The OIG's FY 2020 limited performance audit of AmeriCorps' internal control program⁶ identified deficiencies such as (a) the omission of risk factors from the risk assessment process, (b) lack of documentation to support the conclusions reached on entity level assessments, (c) unexplained inconsistencies between risk assessments by the functional offices and independent validations conducted by OCRO, (d) missing, incomplete, or inadequate documentation to support the internal control assessment, (e) untimely review of key underlying documents, and (f) incomplete assessment of test of design and test of effectiveness, as well as sampling errors. There were eight recommendations of which AmeriCorps is continuing to address or complete implementation of corrective actions.
- The directors of the functional offices participating in the entity-level control assessment continue to lack a full understanding of internal control principles and how they relate to their respective operations. In addition, they did not consider the significant changes in FY 2021 and outstanding audit recommendations when assessing the entity-level controls.
- AmeriCorps conducts its entity-level internal control assessment according to GAO's 17 principles in the *Standard for Internal Control in the Federal Government*. In FY 2021, AmeriCorps rated two of them as low risk and 12 as moderate risk. Those decisions are difficult to reconcile with the identified material weaknesses and the obvious risks flowing

⁶ AmeriCorps OIG Report Number OIG-AR-21-02 [*Performance Audit of AmeriCorps' FY 2020 Internal Control Program and National Service Trust Liability Model*](#)

EXHIBIT A
Material Weaknesses
FY 2021

from the ongoing issues related to the migration to shared services. We found that certain of the risk ratings were not based on adequate information, were not fully supported by the assessment documentation or were inconsistent with the results of our audit.

- AmeriCorps failed to obtain subsidiary statements of assurance and internal control assessments from the Accounting and Financial Management (AFMS), Office of Procurement Services, and Office of Budget and other function units. These critical components were not asked to provide assurance as to the effectiveness of internal control in their respective areas.
- OCRO's internal control assessment and testing did not identify ongoing issues arising from the transition to shared services as a material weakness, despite their significant impact on the financial operations in FY 2021.
- OCRO downgraded financial reporting and procurement management from material weaknesses in FY 2019 to significant deficiencies in FY 2021, without apparent justification. The downgrade is not consistent with AmeriCorps' acknowledged inability to remedy the material weaknesses from prior audits.
- OCRO is still in the process of developing a risk register that records identified risks at the mission and business process level, or Tier 2, as defined by the National Institute of Standards and Technology.

We recommend that AmeriCorps:

5. For each material weakness and significant deficiency, develop an appropriate and actionable corrective plan (CAP) that specifies the interim steps for long-term CAPs, milestones and target completion dates, person(s) responsible for executing the corrective action and the resources available to assist, sufficient and appropriate documentation required, and quality review and approval process. **(New)**
6. Develop a process to explain the discrepancies between material weaknesses reported on the CEO Statement of Assurance and those identified by the external auditors, and document the explanation, as well as the basis for classifying internal control findings as either material weakness or significant deficiency. **(New)**
7. Establish controls and training to ensure that each functional office/unit performs independent assessment of internal controls to inform the CEO's statement of assurance, even if unfavorable outcomes are expected. This proactive approach will promote the early detection of potential findings and allow for prompt remediation. **(New)**

EXHIBIT A
Material Weaknesses
FY 2021

3. Financial System and Reporting (modified repeat finding)

AmeriCorps' financial reporting process and the internal control over it remains inadequate to ensure accuracy in the preparation and quality control of financial statements. While AmeriCorps predicted that migration to ARC would resolve the majority of its unimplemented recommendations, it has not realized these results, in part because the pervasive deficiencies in AmeriCorps' Momentum financial system have carried over into ARC. AmeriCorps continued to experience lingering effects of Momentum throughout FY 2021. These are essentially the same weaknesses and system limitations that prevented AmeriCorps from issuing auditable financial statements for the last five years. AmeriCorps continued to rely on temporary manual adjustments to address these pervasive longstanding issues in FY 2021.

Our audit procedures found that the following conditions continue to exist, despite the migration to shared services:

- A. Financial Statement Audit Scope Limitation
- B. Inability to produce quality, reliable, and complete financial information in a timely manner
- C. Inadequate internal controls in preparing and reviewing financial reports
- D. Improper design of internal control over the use of journal entries (JEs)

OMB Circular No. A-123 requires agency management to establish and maintain internal controls to achieve the objectives of effective and efficient operations, reliable financial reporting, and compliance with applicable laws and regulations.

A. Financial Statement Audit Scope Limitation

Despite a one-year grace period with no financial statement audit in FY 2020 and the shift to shared services at the beginning of FY 2021, AmeriCorps was unprepared for a full scope audit in FY 2021. The lack of progress in addressing the prior year (PY) internal control material weaknesses led AmeriCorps to acknowledge their continued noncompliance with Single Audit and also requested that the audit exclude the following material financial statement lines and significant processes, noting that audit of these areas would likely yield the same or similar results in FY 2019:

- Grants Single Audit Compliance
- Trust Obligation and Liabilities – Validation of the data to the Trust Obligation Liability Model (TOLM, Trust liability)

Additionally, AmeriCorps advised that it would not be able to implement planned changes that would affect their calculation of the Trust Obligation and Liabilities, a material financial statement line, until reporting results of the third quarter of FY 2021. As a result, this line was only available

EXHIBIT A
Material Weaknesses
FY 2021

for audit until after preparation of the June 30, 2021 interim financial statements and the receipt of all required audit documentation. The time limitation imposed by AmeriCorps left us unable to conclude our work on the Trust Obligation and Liabilities.

We recommend that AmeriCorps:

8. Develop a strategic plan and corrective actions that will include steps and milestones to eventually achieve an audit opinion on AmeriCorps' financial statement. The plan should align directly with and describe in detail the implementation plans, specific steps to be taken, resources to be devoted to implementation, responsible personnel and their assigned duties, clear accountability, project management and target dates to complete. It should also include a quality assurance plan to verify effective and timely implementation. **(New)**

B. Inability to produce quality, reliable, and complete financial information timely

Throughout FY 2021, AmeriCorps continues to struggle in preparing, reviewing, and providing accounting information and documentation for audit. Although we set forth a clear schedule without objection at the beginning of the audit and conducted regular status meetings, AmeriCorps frequently responded long after the requested due date, months late in some cases. Also, AmeriCorps didn't have defined roles and responsibilities for providing information and documents requested by the auditors. Often, the documentation provided had not undergone quality review to ensure that the information was without errors, complete, and responsive to the request. The lack of quality control and timely response caused delays and wasted effort. Ultimately, AmeriCorps' inability to provide timely, complete, and high-quality audit schedules and documents, including incomplete populations for sampling, interfered with our ability to evaluate and test financial information.

We recommend that AmeriCorps:

9. Develop and implement audit readiness procedures to ensure that audit information is complete, accurate, has undergone proper quality control procedures, and readily available or can be retrieved timely. The audit readiness procedures should include audit coordination protocol with ARC that clearly define roles and responsibilities of all parties involved in the process. **(New)**

C. Inadequate internal controls over preparing and reviewing financial reports

AmeriCorps' internal control over preparing and reviewing financial reports was inadequate. Examples of the inadequacies were as follows:

- AmeriCorps did not properly research, follow up and effectively document explanations for account balance differences. The agency's monthly trial balance review was

EXHIBIT A
Material Weaknesses
FY 2021

incomplete and ineffective. The budgetary-to-proprietary analysis (tie point) performed was incomplete; because AmeriCorps did not follow up to explain or reconcile significant variances. The purpose of the high-level tie point analysis is to detect anomalies in balances and correct them or provide fact-specific explanations for the discrepancies. Instead, AmeriCorps continued to provide generic explanations that do not address the root cause of the differences. Without a root cause analysis, AmeriCorps may not be able to correct the problem, which will recur. The lack of a rigorous process may cause AmeriCorps to overlook substantial but correctable financial management errors.

- We identified uncorrected misstatements on the financial statements; abnormal balances; and incomplete financial statement and notes as part of our audit of the June 30, 2021, (interim) financial statement. Other examples of issues identified were reconciliation differences between AmeriCorps internal trial balance and the U.S. Treasury's Governmentwide Treasury Account Symbol Trial Balance (GTAS), which were caused by untimely recording of accounting transactions and failure to remove cancelled funds activity in its trial balance.
- AmeriCorps did not perform a complete and reliable fluctuation analysis of the June 30, 2021, account balances. The explanations provided for significant balance fluctuations were generic and did not address the specific nature of the transactions or the change in operations or trends that would identify the root causes of the fluctuations. AmeriCorps did not document its expectations based on its operating environment and compare those expectations to the identified significant balance fluctuations for reasonableness or unexpected change.

We recommend that AmeriCorps:

10. Develop comprehensive policies and procedures to document its financial statement preparation process. The policies and procedures should clearly delineate responsibilities among various members of the Accounting and Financial Management Service (AFMS) group and team leads and those performed by AmeriCorps' shared service provider, clarifying the responsibility of AmeriCorps for the accuracy of the reported information. The policies and procedures should address the following aspects: ***(Modified Repeat)***
 - a. The process to determine and document AmeriCorps' balance fluctuation expectations based on a combination of internal and external operating factors, and program and financial relevant information available.
 - b. Detailed process to research significant balance fluctuations. AmeriCorps should research and explain all significant balance fluctuations at the account and transaction level. Maintain and have the supporting documentation readily available.
 - c. Research and retain supporting documents required for any identified account balance differences derived from its abnormal balance review or the tie point analysis.

EXHIBIT A
Material Weaknesses
FY 2021

- d. Address fatal and non-fatal Government-wide Treasury Account Symbol edit failures prior to GTAS certification.
- e. Document resolution for all balance differences and retain supporting documentation of related research.

These open repeat recommendations can be found in [Exhibit C](#), Status of Prior Year Recommendations, for open repeat recommendations.

D. Improper design of internal control over the use Journal Entries (JE)

Journal entries are both recurring and non-recurring manual on top adjustments used to record, usually large, transactions into the financial system. They are used to fix errors, reclassify balances, or record amounts that were not reported due to timing and period cut-offs in the financial systems. However, they do not go through the established system of controls designed to record normal recurring transactions, and thus reliance on JEs increase AmeriCorps' susceptibility to errors and misstatement in the financial statements. As of June 30, 2021, AmeriCorps used JEs to record approximately \$12.6 billion in absolute value transactions, a significant increase from the prior year. AmeriCorps over relied on the JEs to fix issues that initially existed in the Momentum environment that were not remediated prior to conversion to Oracle.

Also, AmeriCorps used JEs to address significant recurring financial reporting issues across multiple funds, instead of addressing the underlying root causes.

We also identified other control deficiencies such as duplication in the use of JEs, missing document numbers, and lack of documentation explaining the need for or root cause for the adjustment and approval. Further, there was no evidence of proper segregation of duties, reconciliation issues between JE detail and JE log, and instances in which AmeriCorps and ARC approved and processed JEs with incorrect general ledger account, requiring another JE to correct the error. The over-reliance, incorrect usage, and inaccurate JEs create a high risk of material misstatements in the financial statement.

We recommend that AmeriCorps:

- 11. Continue working with Administrative Resource Center to review and correct AmeriCorps' balances in detail to ensure they are properly supported and that balances migrated to the ARC platform are complete, accurate, and reliable. **(Modified Repeat)**
- 12. Strengthen its policies and procedures over the processing of JEs going forward now that AmeriCorps has transitioned to the shared service environment. The policies and procedures should cover the following:
 - a. A process to track the sequence of JE transactions for completeness.

EXHIBIT A
Material Weaknesses
FY 2021

- b. A policy as to when it is appropriate to use a JE and approval procedures for JEs recorded to ensure segregation of duties.
- c. A requirement to provide a fact-specific description of the purpose of the JE, along with adequate supporting documentation.
- d. Documentation needed to support JEs and how it will be maintained. **(Modified Repeat)**

13. Validate and ensure JEs are properly supported, documented, and are readily available for examination. **(Modified Repeat)**

Additional open repeat recommendations from the FY 2019 audit report can be found in [Exhibit C](#), Status of Prior Year Recommendations.

We also continue to report the Trust Obligations and Liability Model as a material weakness and the related unimplemented recommendations are listed in [Exhibit C](#)

EXHIBIT B
Significant Deficiency
FY 2021

Information Technology Security Controls (modified repeat finding)

AmeriCorps relies extensively on information technology (IT) systems to initiate, authorize, record, process, summarize and report financial transactions in the preparation of its financial statement. Internal controls over these financial and supporting operations are essential to ensure the integrity, confidentiality, and reliability of critical data while reducing the risk of errors, fraud, and other illegal acts.

To balance high levels of service and reduce costs, AmeriCorps' Office of Information Technology has outsourced the operation, maintenance, and support of most of its IT systems. AmeriCorps outsourced its financial operations to a shared service provider for the first time this fiscal year. The new financial system of record interfaces with Momentum for the purpose of retrieving grants management data from eSPAN. Outsourcing introduces special considerations and risks regarding the protection of information and information systems. Despite the outsourcing of IT systems, AmeriCorps by law retains responsibility for complying with the requirements of the security control implementation.

Our review of IT controls covered general and application controls at the AmeriCorps Washington, D.C. Headquarters. Our current year audit identified security control weaknesses that were corrected for certain control activities. Examples of AmeriCorps' improvements in its IT control environment include conducting background investigations and reinvestigations of current employees and enhancing physical access controls to safeguard personally identifiable information.

While AmeriCorps has taken some steps to remediate previously identified information security control weaknesses, AmeriCorps continues to face challenges in the consistent implementation of its information security program and monitoring of security controls. In addition, we identified new and continued control weaknesses in the information security program that need to be addressed, most importantly pertaining to configuration management controls, including vulnerability management, access controls, and organization-wide risk management. Specifically, we identified enterprise findings for each of the following domains:

Configuration Management

- AmeriCorps did not resolve critical and high-risk vulnerabilities within the timeframes specified by its internal operating policies. As a result, vulnerabilities related to patch management, configuration management, and unsupported software continue to expose AmeriCorps' network to critical and high severity vulnerabilities. While our independent vulnerability scans indicated that the number of vulnerabilities has decreased since last year, issues remain with applying older patches and remediating older configuration weaknesses.
(Modified Repeat)
- AmeriCorps did not develop baseline configuration documentation for all platforms in its

EXHIBIT B
Significant Deficiency
FY 2021

environment and ensure that these standard baseline configurations are appropriately implemented, tested, and monitored for compliance with established security standards.

(Modified Repeat)

- The tracking of IT components in the asset inventory was incomplete, and software assurance controls have not been fully implemented for mobile devices due to delays in implementing a new mobile device management tool. **(Modified Repeat)**
- Change management documentation was not consistently recorded for system changes made to the General Support System (GSS), Electronic-Systems for Program Agreements and National Service Participants (eSPAN), and Momentum applications. **(New)**

Access Control

- AmeriCorps did not adequately manage user accounts and/or passwords for the network and the Momentum application. For example, AmeriCorps did not disable all network and Momentum accounts of separated employees, did not disable inactive privileged accounts, and did not properly manage passwords that were not changed after a designated timeframe as specified in AmeriCorps' policies. **(Modified Repeat)**
- In March 2020, AmeriCorps removed mandatory enforcement of Personal Identity Verification (PIV) multifactor authentication⁷ in response to the COVID-19 pandemic and has not reinstated the control. Agency management attributes this to the need for full-time telework during the COVID-19 pandemic. However, this conflicts with government-wide guidance issued by the Cybersecurity and Infrastructure Security Agency (CISA) directing agencies to use multifactor authentication during pandemic-related telework. **(Modified Repeat)**
- AmeriCorps did not conduct an annual incident response test as required by AmeriCorps policy. **(New)**

In addition, prior weaknesses related to access controls at AmeriCorps' field offices have not been remediated.

Security Management

- AmeriCorps did not develop, document, and communicate an overall Supply Chain Risk Management strategy, implementation plan, and related policies and procedures to guide and govern supply chain risk management activities. **(New)**
- AmeriCorps did not maintain an Interconnection Security Agreement between AmeriCorps and Social Security Administration. **(New)**

⁷ Multifactor authentication requires two or more credentials when logging on to information systems. Credentials include something an individual knows, such as a password, and something an individual possess, such as a PIV card or fingerprint.

EXHIBIT B
Significant Deficiency
FY 2021

- AmeriCorps did not complete a risk register to record identified risks at the mission and business process level, as defined by the National Institute of Standards and Technology.⁸ **(Repeat)**
- AmeriCorps did not ensure individuals with access to personal identifiable information (PII) completed annual privacy-role based training. **(Repeat)**

Contingency Planning

- AmeriCorps did not conduct an annual disaster recovery test and train its disaster recovery personnel for the GSS and eSPAN as required by AmeriCorps policy. **(New)**

Many of these weaknesses can be attributed to inconsistent enforcement of the agency-wide information security program across the enterprise. These deficiencies can increase the risk of unauthorized access to AmeriCorps' systems used to capture, process, and report financial transactions and balances. Effective system security begins with strong governance, including agency-level oversight and controls monitoring of AmeriCorps field offices. This includes ensuring accountability within the Office of Information Technology leadership for accomplishing milestones and achieving measurable results in support of a strategy to achieve an effective level of information security at AmeriCorps.

Further, the Federal Information Security Management Act (FISMA) legislation requires each agency to have a Chief Information Security Officer (CISO), whose principal duty is cybersecurity. However, AmeriCorps allowed this position to remain vacant from October 2020 to June 2021, with an acting official in the role. Given the agency's weaknesses in key information security controls and the importance of this function, the lack of a permanent CISO, with the ability to advise the agency head on key issues of cybersecurity policy, enforcement and needed improvements, detracted from the opportunity to make progress.

By not effectively implementing and enforcing IT policies and procedures and working towards automation, continuous monitoring and consistent application of controls, there is an increased risk that financial information and PII may be inadvertently or deliberately misused and may result in improper disclosure or theft without detection. Without remediating all significant security vulnerabilities, systems could be compromised resulting in potential harm to confidentiality, integrity, and availability of AmeriCorps' financial and sensitive data.

⁸ NIST Special Publication 800-39, Revision 1, *Managing Information Security Risk Organization, Mission, and Information System View*, specifies an integrated risk management process three-tiered approach for managing risk across an organization that "addresses risk at the: (i) organization level; (ii) mission/business process level; and (iii) information system level. The risk management process is carried out seamlessly across the three tiers with the overall objective of continuous improvement in the organization's risk-related activities and effective inter-tier and intra-tier communication among all stakeholders having a shared interest in the mission/business success of the organization."

EXHIBIT B
Significant Deficiency
FY 2021

We recommend that AmeriCorps:

Since AmeriCorps has not implemented consistent automated processes to address continued control weaknesses in its information security program, we reiterate the same prior year's recommendations to assist AmeriCorps in holding individual stakeholders accountable for remediation of control weaknesses and ensuring information technology security controls operate as intended agency wide. The recommendations for these conditions can be found in [Exhibit C](#), Status of Prior Year Recommendations.

EXHIBIT C
Status of Prior Year Recommendations
FY 2021

AmeriCorps' latest full scope Trust financial statement audit was in fiscal year 2019. As there was no Trust financial statement audit conducted in FY 2020, we are presenting the status of FY 2019 recommendations in FY 2021. As the scope of audit in FY 2021 was limited, many of the FY 2019 recommendations were still open in FY 2021. These open recommendations were not duplicated as recommendations in the report on internal control and report on compliance (reports). The modified repeat recommendations in FY 2021 were recommendations from FY 2019 but were adapted to the FY 2021 results. The summary of the status of the FY 2019 Trust financial statement audit recommendations in FY 2021 is in Table 1. The detail of each recommendation is presented in Table 2.

Table 2: Status in FY 2021 and Detail Description of Each Recommendation from FY 2019 Financial Statement Audit

FY19 Audit Report Finding Area	FY19 Trust Audit Report Rec. Number (FY 19 Consolidated FS Report Recommendation Number)	Recommendation Description	Status of FY19 Recommendations in FY21
Material Weakness (MW)	1 (1)	Establish a formal process that provides the CEO with comprehensive information on the results of AmeriCorps' internal control assessment, status of open material weaknesses and significant deficiencies from prior year's financial statement audits, and information on issues that could be reported as a significant deficiency or a material weakness in the current year's financial statement audit for consideration in preparing the AmeriCorps assurance statement. This should also include the status of open recommendations from other audits that have a significant impact on AmeriCorps operations or financial reporting.	Closed
	2 (2)	Provide training to AmeriCorps officials participating in the entity-level control assessment to ensure that they have a full understanding of the internal control principles and how these principles relate to their operations. The training shall also address how the outstanding audit recommendations concerning their operations should be considered when assessing the entity-level controls.	Repeat – Material Weakness (MW) Open Recommendation
Internal Control Program (FMFIA)	3 (3)	Revise the AmeriCorps Statement of Assurance Preparation and Submission Guidance (March 2019) to: a. Require the functional offices to consider external and internal audits and investigations in identifying and reporting on control deficiencies. b. Require the functional offices to identify the impact that the material weakness or significant deficiency has on the financial statements or on AmeriCorps' operations in their assurance statements.	Closed
	4 (4)	Revise the AmeriCorps Financial Reporting Testing Plan to include verifying that the fluctuation analyses are conducted properly within the required thresholds.	Closed
	5 (6)	Provide training to appropriate AmeriCorps personnel regarding the purpose of the Data Quality Plan.	Closed

Subject: Management's Response to Independent Auditors' Report

Thank you for the opportunity to comment on the FY 2021 Independent Auditors' Report from CliftonLarsonAllen LLP (CLA). AmeriCorps has reviewed the results of the financial statements audit, and the audit of the financial statements of the National Service Trust. This is a consolidated response to both reports.

We acknowledge the auditors' disclaimer of opinion on the financial statements, including the identification of nine material weaknesses and one significant deficiency, and its review of the agency's internal control over financial reporting and compliance with laws and regulations. The independent audit of the agency's financial statements and related processes is a core component of AmeriCorps' financial management program, and we look to the findings and recommendations to help us target and prioritize corrective actions that directly support our efforts to improve AmeriCorps' financial management practices.

AmeriCorps is committed to implementing strategic reforms to the agency's audit management and resolution efforts, focusing heavily on agency audit readiness, improving operational and programmatic internal controls, and increasing senior leadership engagement in corrective action planning and oversight. Using our existing and new resources, such as funds through the American Rescue Plan, we are making greater investments in critical mission support staffing; improving data management and analysis; and modernizing our antiquated systems as we work to actively identify root causes, prioritize and implement robust corrective action plans, and monitor remediation efforts at the highest levels of leadership throughout the agency. The agency commits to ongoing consultation with your office to address our pressing challenges.

Additionally, we will continue efforts to improve our trust and grants accrual methodology and transition of vital core business functions to shared services. This transition and our partnership with Treasury is AmeriCorps' most significant and impactful strategy to directly address key audit findings and strengthen the agency's overall financial management. Moreover, we are including effective stewardship of resources as an agency strategic goal in our draft 2022-2026 Strategic Plan that will serve as a roadmap for resource prioritization and investments.

To further increase senior leadership engagement, we are initiating a new internal audit accountability and reporting structure. This will include regular corrective action meetings with executive and senior leadership to review progress toward approved

EXHIBIT D
Management's Response
FY 2021

corrective and preventive actions. The agency's Risk Management Council will play a significant role here, with increased governance over agency risk and accountability, as well as tracking resolution. To enhance oversight, we are developing a shared platform to track corrective actions and increase leadership visibility and awareness of corrective action status. Such transparency will enable leadership to provide proactive, consistent, and timely updates to key stakeholders invested in the agency's progress towards audit resolution.

In addition to our new internal accountability efforts, we have initiated other audit management reforms, including contract vehicles that will allow access to much needed financial management and audit expertise, more robust agency audit training focused on quality corrective action planning and reporting, and investments to identify and implement business process improvements to core mission support functions.

AmeriCorps fully supports the requirements for auditability of its financial statements and understands its obligations for providing accountability and transparency. We are working diligently to complete our reviews of new audit findings and to correct these shortcomings for future audits. AmeriCorps' leadership is committed to continuing the work to more comprehensively demonstrate and understand agency efforts and mitigation strategies to ensure prioritization and progress in the months and years to come.
