

# **Summary: Investigation of Reported Failure to Submit Oil and Gas Reports to ONRR**

**Report Date: January 5, 2015**

On December 1, 2015, the Bureau of Land Management Special Investigations Group reported that a lease operator in New Mexico had not submitted any Oil and Gas Operations Reports (OGOR) to the Office of Natural Resources Revenue (ONRR) since September 2014.

A preliminary investigation substantiated that the lease operator did not properly file mandated OGOR to ONRR; however, our review of royalty reports submitted to ONRR disclosed that the company reported and paid mineral royalties associated with the lease during the period in question.

This is a summary of an investigative report that was issued to ONRR for any action deemed appropriate.
