November 17, 2015

# MEMORANDUM FOR JAIME M. SALING, DIRECTOR FINANCIAL AND BUDGET REPORTS DIRECTORATE BUREAU OF THE FISCAL SERVICE

# DAWN SIMPSON, ASSISTANT DIRECTOR FINANCIAL MANAGEMENT AND ASSURANCE GOVERNMENT ACCOUNTABILITY OFFICE

REGINA KEARNEY SENIOR ADVISOR TO THE DEPUTY CONTROLLER OFFICE OF MANAGEMENT AND BUDGET

- FROM:Ade BankoleActing Director, Financial and Procurement Audit
- SUBJECT:Audit of the Department of the Treasury's Closing PackageFinancial Statements for Fiscal Years 2015 and 2014

We contracted with the independent certified public accounting firm of KPMG LLP (KPMG) to audit the closing package financial statements of the Department of the Treasury for fiscal years 2015 and 2014, and to provide a report on internal control over financial reporting, and to report any reportable noncompliance with the *Treasury Financial Manual* Volume I, Part 2, Chapter 4700 (TFM Chapter 4700). The contract required that the audit be performed in accordance with U.S. generally accepted government auditing standards and Office of Management and Budget (OMB) Bulletin No. 15-02, *Audit Requirements for Federal Financial Statements*.

In its audit, KPMG found

- the closing package financial statements were fairly presented, in all material respects, in accordance with U.S. generally accepted accounting principles;
- there were no material weaknesses in internal control; and
- no reportable noncompliance with TFM Chapter 4700.

In connection with the contract, we reviewed KPMG's report and related documentation and inquired of its representatives. Our review, as differentiated

# Page 2

from an audit performed in accordance with U.S. generally accepted government auditing standards, was not intended to enable us to express, and we do not express, an opinion on the closing package financial statements, or make any conclusions with regard to the effectiveness of internal control over financial reporting or compliance with TFM Chapter 4700. KPMG is responsible for the attached auditors' report dated November 17, 2015, and the conclusions expressed therein. However, our review disclosed no instances where KPMG did not comply, in all material respects, with U.S. generally accepted government auditing standards and OMB Bulletin No. 15-02.

Should you have any questions, please contact me at (202) 927-5329.

**INDEPENDENT AUDITORS' REPORT** 

THIS PAGE INTENTIONALLY LEFT BLANK

KPMG LLP Suite 12000 1801 K Street, NW Washington, DC 20006

# **Independent Auditors' Report**

Inspector General Department of the Treasury:

### **Report on the Closing Package Financial Statements**

We have audited the accompanying Closing Package Financial Statement Report of the Department of the Treasury (Department), which comprise the Closing Package Financial Statement Report – Balance Sheet as of September 30, 2015 and 2014, and the related Closing Package Financial Statement Reports – Statement of Net Cost and Statement of Changes in Net Position for the years then ended, and the related Financial Report (FR) Notes Reports (except for the information in the FR Notes Reports entitled "Threshold"); the accompanying Note 31 – Significant Accounting Information; the accompanying Trading Partner Summary Note Report – Balance Sheet as of September 30, 2015 and 2014; and the related Trading Partner Summary Note Reports – Statement of Net Cost and Statement of Changes in Net Position for the years then ended (hereinafter referred to as the "closing package financial statements").

### Management's Responsibility for the Closing Package Financial Statements

Management is responsible for the preparation and fair presentation of these closing package financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the closing package financial statements that are free from material misstatement, whether due to fraud or error.

### Auditors' Responsibility

Our responsibility is to express an opinion on these closing package financial statements based on our audits. We did not audit the financial statements of the Internal Revenue Service (IRS), a component entity of the Department, which statements reflect total assets of \$48.7 and \$49.2 billion, net cost of operations of \$11.8 and \$12.1 billion before applicable eliminating entries, and custodial activity of \$3,304 and \$3,069 billion, as of and for the years ended September 30, 2015 and September 30, 2014, respectively. Those statements were audited by other auditors, whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for IRS, is based solely on the report of the other auditors.

We also did not audit the financial statements of the Office of Financial Stability (OFS), a component entity of the Department, which statements reflect total assets of \$28.6 and \$35.4 billion, and net cost of operations of \$4.4 and \$3.0 billion before applicable eliminating entries, as of and for the years ended September 30, 2015 and September 30, 2014, respectively. Those statements were audited by other auditors, whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for OFS, is based solely on the report of the other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 15-02, *Audit Requirements for Federal Financial Statements*. Those standards and OMB Bulletin

No. 15-02 require that we plan and perform the audit to obtain reasonable assurance about whether the closing package financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the closing package financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the closing package financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the closing package financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the closing package financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **Opinion on the Closing Package Financial Statements**

In our opinion, based on our audits and the reports of the other auditors, the closing package financial statements referred to above present fairly, in all material respects, the financial position of the Department of the Treasury as of September 30, 2015 and 2014, and its net costs and changes in net position for the years then ended in accordance with U.S. generally accepted accounting principles.

### **Emphasis of Matter**

We draw attention to Note No. 31 – Significant Accounting Information to the closing package financial statements, which describes that the accompanying closing package financial statements were prepared to comply with requirements of the *Treasury Financial Manual* (TFM) Volume I, Part 2, Chapter 4700 (TFM Chapter 4700) for the purpose of providing financial information to the Department's Bureau of the Fiscal Service (Fiscal Service) and the U.S. Government Accountability Office (GAO) to use in preparing and auditing the *Financial Report of the U.S. Government*, and are not intended to be a complete presentation of the consolidated balance sheets of the Department as of September 30, 2015 and 2014, and the related consolidated statements of net cost, consolidated statements of changes in net position, combined statements of budgetary resources, and statements of custodial activity for the years then ended (hereinafter referred to as the "general-purpose financial statements"). Our opinion is not modified with respect to this matter.

As discussed in FR Notes Report Nos. 4A, 28A, 28B, and Note 31 – Significant Accounting Information, the Department is a participant in significant legislation and transactions whose purpose is to assist in stabilizing the financial markets. Also as discussed in Note 31 – Significant Accounting Information, the closing package financial statements do not include the assets, liabilities, or results of operations of commercial entities in which the Department has a significant equity interest as it has determined that none of these entities meet the criteria for inclusion as a federal entity and are therefore not included in the closing package financial statements. Furthermore, as discussed in Note 31 – Significant Accounting Information, the value of certain investments, loans, and commitments is based on estimates. These estimates are inherently subject to substantial uncertainty arising from the likelihood of future changes in general economic, regulatory, and market conditions. In addition, there are significant uncertainties related to the amounts that the Department will realize from its investments. As such, there will likely be differences between the estimated value of these investments, loans, and commitments as of September 30, 2015 and 2014, and the amounts that may ultimately be realized from these assets or may be required to settle these commitments. Such differences may be material and will also affect the ultimate cost of these programs. Our opinion is not modified with respect to these matters.

#### **Other Matters**

#### **Opinion on the General-Purpose Financial Statements**

We have audited, in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and OMB Bulletin No. 15-02, the general-purpose financial statements of the Department of the Treasury as of and for the years ended September 30, 2015 and 2014, and our report thereon, dated November 16, 2015, expressed an unmodified opinion on those financial statements.

#### Required Supplementary Information

U.S. generally accepted accounting principles require that the information in Other Data Report Nos. 1, 8, 9, 14, 17, and 18, except for the information included in the Other Data Info Section C – Tax Gap of Other Data Report No. 1 and Other Text Data of Other Data Report No. 1 (which are discussed below), be presented to supplement the basic closing package financial statements. Such information, although not a part of the basic closing package financial statements, is required by the Federal Accounting Standards Advisory Board who considers it to be an essential part of financial reporting for placing the basic closing package financial statements, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic closing package financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the Combining Statement of Budgetary Resources and Management's Discussion and Analysis that U.S. generally accepted accounting principles require to be presented to supplement the basic closing package financial statements. Such missing information, although not a part of the basic closing package financial statements, is required by the Federal Accounting Standards Advisory Board who considers it to be an essential part of financial reporting for placing the basic closing package financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic closing package financial statements is not affected by this missing information.

#### **Other Information**

Our audits were conducted for the purpose of forming an opinion on the closing package financial statements as a whole. The information included in the Other Data Report Nos. 2, 11, 12, 15, and 16; the information included in the Other Data Info Section C – Tax Gap of Other Data Report No. 1; the information entitled in the Other Text Data of Other Data Report No. 1; the information entitled "Threshold" in FR Notes Report Nos. 2 through 4B, 6 through 9, 10B, 15, 19, and 28A; the information in the Closing Package Line Reclassification Summary Report – Balance Sheet; the information in the Closing Package Line Reclassification Summary Report – Statement of Net Cost; the information in the information in the Closing Package Line Reclassification Summary Report – Statement of Changes in Net Position; and the information in the Closing Package Line Reclassification Summary Report – Custodial Activity are presented for purposes of additional analysis in accordance with TFM Chapter 4700 and are not a required part of the closing package financial statements. Such information has not been subjected to the auditing procedures applied in the audits of the closing package financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

# Restriction on Use of the Report on the Closing Package Financial Statements

This report is intended solely for the information and use of the Department's management, the Department's Office of the Inspector General, the Fiscal Service, OMB, and GAO in connection with the preparation and audit of the *Financial Report of the U.S. Government* and is not intended to be and should not be used by anyone other than these specified parties.

# Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards* and OMB Bulletin No. 15-02, we have also issued a combined auditors' report dated November 16, 2015, which presents our opinion on the Department's general-purpose financial statements; our consideration of the Department's internal control over financial reporting; and the results of our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, and other matters that are required to be reported under *Government Auditing Standards*. That report should be read in conjunction with this report in considering the results of our audits of the closing package financial statements. Our audit of the general-purpose financial statements as of and for the year ended September 30, 2015 disclosed the following material weakness, significant deficiency, and noncompliance:

A. Material Weakness in Internal Control Over Financial Reporting at the IRS (Repeat Condition)

B. Significant Deficiency in Internal Control Over Information Systems at the Bureau of the Fiscal Service (Repeat Condition)

C. Noncompliance with Federal Financial Management Improvement Act of 1996 (Repeat Condition)

# Internal Control Over Financial Reporting Specific to the Closing Package Financial Statements

In planning and performing our audit of the closing package financial statements, we also considered the Department's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the closing package financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control. Accordingly, we do not express an opinion on the effectiveness of the Department's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control for the closing package financial statements was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

#### Compliance and Other Matters Specific to the Closing Package Financial Statements

As part of obtaining reasonable assurance about whether the Department's closing package financial statements are free from material misstatement, we also performed tests of its compliance with certain provisions of TFM Chapter 4700, noncompliance with which could have a direct and material effect on the determination of the closing package financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit of the closing package financial statements, and accordingly, we do not express such an opinion. The results of our tests of compliance with

TFM Chapter 4700 disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* or OMB Bulletin No. 15-02.

# Purpose of the Other Reporting Required by Government Auditing Standards

The purpose of the communication described in the Other Reporting Required by *Government Auditing Standards* section is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the Department's internal control or compliance. Accordingly, this communication is not suitable for any other purpose.

Tab: Text Data	Overster	•				
Line 1	Question Describe any significant events or transactions that occurred after the date of the Balance Sheet but before the issuance of agency?s audited financial statements that have a material effect on the financial statements and, therefore, require adjustments or disclosure in the statements.	<b>Answer</b> N/A				
2	Describe any departures from U.S. GAAP.	N/A				
3	When applying the general rule of the Statements of Federal Financial Accounting Standards (SFFAS) No. 7, par. 48, describe the specific potential accruals that are not made and the practical and inherent limitations affecting the accrual of taxes and duties.	N/A In accordance with SFFAS No. 7, Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting, some unpaid tax assessments do no meet the criteria for financial statement recognition. Under Internal Revenue Code Section 6201, the Department is authorized and required to make inquiries, determinations, and assessments of all taxes which have not been duly paid (including interest, additions to the tax, and assessable penalties) under the law. Unpaid assessments result from taxpayers filing returns without sufficient payment, as well as from tax compliance programs such as examination, under- reporter, substitute for return, and combined annual wage reporting. The Department also has authority to abate the paid or unpaid portion of an assessed tax, interest, and penalty. Abatements occur for a number of reasons and are a normal part of the tax administration process. Abatements may result in claims for refunds or a reduction of the unpaid assessed amount. Under federal accounting standards, unpaid assessments require taxpayer or court agreement to be considered federal taxes receivable. Assessments not agreed to by taxpayers or the courts are considered compliance assessments and are not considered federal taxes receivable. Due to the lack of agreement, these compliance assessments are less likely to have future collection potential than those unpaid assessments that are considered federal taxes receivable.				
4	Describe any change in accounting if a collecting entity adopts accounting standards that embody a fuller application of accrual accounting concepts that differ from that prescribed by SFFAS No. 7, par. 48.	N/A				
5	Describe any additional significant accounting policies specific to the agency not included in GFRS Module GF006 FR Notes.	N/A				
6	Provide any other relevant information pertaining to the Federal Reserve earnings.	See Note 31 Part 2.AB				
7	Describe the nature of the related party relationship and transactions pertaining to the amount in the "Other Notes Info" tab, "Related party receivables" line.	See Note 31 Part 2.AB				
8	Describe the nature of the related party relationship and transactions pertaining to the amount in the "Other Notes Info" tab, "Related party payables" line.	N/A

Line	Question	Answer
1	Describe the nature of the amount in the line item "Other cash - not restricted."	This is mainly comprised of cash reported by the Fiscal Service as Miscellaneous Cash listed in Note 5 of the Department's AFR. It is mainly cash expected to be included in Operating Cash in the near future and it fluctuates daily.
2	Describe the restrictions on the cash reported in the line item "Other cash - restricted" and any statutory authority (law, regulation, or agreement).	This is mainly non-entity, includes seized cash reported by the Treasury Forfeiture Fund and international reserve assets created by the International Monetary Fund.
3	If the cash is restricted because it is non-entity, state the entity for which the cash is being held.	Internal Revenue Service that is held for taxpayers. Treasury Forfeiture Fund individuals or entities who own the seized cash. International Monetary Fund domestic currency available as needed through non-interest bearing letter of credit. Office of Financial Stability payments of claims under the FHA-Refinance Program.
4	Is the reported restricted cash being held in a financial institution? If yes, is it a Treasury- designated bank?	The Office of International Affairs maintains funds at the Federal Reserve Bank in New York that are restricted for use by the IMF. The articles of agreement with the IMF provide for return of these funds should the U.S. withdraw from the IMF. Other restricted assets are held at Treasury designated financial institutions.
5	If the agency has restricted cash, is the restricted cash invested? If yes, is it invested in a Bureau of the Fiscal Service security, agency security, and/or non-federal security?	Invested cash is displayed on the balance sheet as investments rather than cash. Investments in FSD securities are eliminated from the Department's balance sheet.
6	Describe the nature of the amount in the line item "Foreign currency."	Foreign currency is held by the Exchange Stabilization Fund. All operations of the ESF require the explicit authority of the Secretary of the Treasury. Fiscal Service Operating Cash also hold foreign currency in a custodial capacity for the use of the entire U.S. Government.
7	Disclose any restrictions on the use (for example, by law, regulation, or agreement) of the amount in the line item "Foreign Currency."	Ν/Α
8	Disclose the method of exchange rate used on the financial statement date (Treasury exchange rate or prevailing market rate).	Treasury exchange rate.
9	Provide additional details describing the nature and cause of reconciling items reported in Section C, lines 2 through 6.	N/A
10	Provide any other relevant information pertaining to this note. At a minimum, describe briefly the significant accounting policies pertaining to this note.	
		See Note 31 Part 2.F

Line Description	Question	Answer			
Line Item Notes - SBLF (CY Face Value of loans outstanding)	Please provide explanations for any amounts that have changed by 10% or more and or greater than 500,000 between the current fiscal year and prior fiscal year. (Unaudited)	The \$0.8 billion decrease of the Current Year Face Value of the Small Business Lending Facility (SBLF) Loans Outstanding is primarily due to the increase in repayments from Banks participating in the SBLF Program.			
Line Item Notes - HFA (CY Face Value of loans outstanding)	Please provide explanations for any amounts that have changed by 10% or more and or greater than 500,000 between the current fiscal year and prior fiscal year. (Unaudited)	The decrease in Housing Finance Agency (HFA) program Direct Loans Receivable is due mainly to \$0.9 billion in principal collections paid by HFAs during FY 2015.			
Line Item Notes - HFA (CY Long-term cost of loans outstanding)	Please provide explanations for any amounts that have changed by 10% or more and or greater than 500,000 between the current fiscal year and prior fiscal year. (Unaudited)	Variance presented is not material to the Department's consolidated financial statements.			
Line Item Notes - IMF-NAB (Non FCRA) (CY Face Value of loans outstanding)	Please provide explanations for any amounts that have changed by 10% or more and or greater than 500,000 between the current fiscal year and prior fiscal year. (Unaudited)	The \$3.9 billion year-to-year decrease is a result of New Arrangements to Borrow (NAB) loan repayments exceeding new loan disbursements. Loan repayments totaled \$4.7 billion whereas, for the same period, loan disbursements totaled \$0.7 billion.			
Line Item Notes - All other loans receivable (CY Face Value of loans outstanding)	Please provide explanations for any amounts that have changed by 10% or more and or greater than 500,000 between the current fiscal year and prior fiscal year. (Unaudited)	Variance presented is not material to the Department's consolidated financial statements.

Line	Question	Answer
1	Provide a description of the amounts reported on the "Line Item Notes" tab for lines 5, 8 and 9.	CDF - Line 5 represents \$.5M in convertible subordinated debt securities and \$1.5M in secondary capital investments in federal credit unions. Line 8 represents \$2M of other equity securities with limited partnership interests.
2	Provide a description of the amounts reported on the "Other Notes Infor" tab for lines 5, 8 and 9 in Sections A through C.	CDF - Line 5 represents \$2M in convertible subordinated debt securities (and the related \$1.8 discount on imputed interest) and \$2M in secondary capital investments in federal credit unions. Line 8 represents \$5.5M of other equity securities with limited partnership interests. All of CDFI securities are "Held to Maturity."
3	Provide the basis on which the cost of a security sold or the amount reclassified out of accumulated other comprehensive income into earnings was determined (FASB ASC 320-10-50-9).	ESF - All long term investments held by ESF maturing in FY15 were reclassified to earnings based on the calculation of fair value less the amortized cost.
4	Provide the circumstances leading to the decision to sell or transfer the security for held-to- maturity securities (FASB ASC 320-10-50-10).	N/A
5	Provide any other relevant information pertaining to this note. At a minimum, describe briefly the significant accounting policies pertaining to this note.	See Note 31. Part 2. I.

Line	Question	Answer				
1	Pursuant to federal law, are old currencies issued by the federal government and not yet redeemed or written off identified as a Federal debt liability at face value?	Fiscal Service does not write off debt. The matured Unredeemed (old) debt is recorded at par value and is also fully amortized. Therefore, yes, it is recorded at face value in the debt liability.				
2	Provide the losses or gains for the difference between the reacquistion price and the net carrying value of the extinguished debt recognized currently in the period of the extinguishment for those securities that are retired before the maturity date	Currently, Marketable Treasury Securities and most non-marketable Treasury securities are not early redeemable. Therefore, there are no gains or losses to record. These securities are redeemed at par value.				
	because of a call feature of the security, or because they are eligible for redemption by the holder on demand.	The only Treasury securities that are early redeemable are Government Account Series securities (GAS), which are non-marketable. However, the intent of the GAS program is to hold to maturity, and because of this intent the information found in SFFAS 1 and 5, Fiscal Service records these securities at amortized cost, not the market value. Gains and losses are not broken out and reported separately because they are not material.				
3	Securities that have unkown redemption or maturity values at the time of issue should be origninally valued and periodically revalued. Were the securities that meet this definition revalued at their current value as of the date of the financial statements?	N/A				
4	Provide any other relevant information pertaining to this note. At a minimum, describe briefly the significant accounting policies pertaining to this note.	See Note 31 Part 2 K.				
		FY 2014 Treasury marketable security - Floating Rate Notes (FRN) balance of \$122,985 million was included in line 4. Treasury Inflation Protected Securities balance. Seperate line for FRN was not added in GFRS in FY 2014.

Line	Question	Answer
1	Provide more details on the liabilities reported on the "Line Item Notes" tab for each line 1 through 21 by including a description of the significant related amounts and providing the page number and the documentation support by email to FRD's central mailbox at financial.reports@fiscal.treasury.gov if amounts identified cannot be directly traced to the agency's financial report.	Line 3-Note 6, Line 5-Note 5, Line 10 - Note 17, and Line 20-Note 5 of the Department's AFR (AFR)
2	Provide a description and related amounts for balances that exceed \$50 million on the Line Item Notes tab, line 21, "Other liabilities," and provide the page number of the agency's financial report where the amount is identified.	Other Liabilities consist of Liability for Restoration of Federal Debt Principal and Interest of \$204.6 billion (AFR Note 15), payments due to state and local governments, and TFF seized currency liabilities.
3	Provide the amounts that are designated as either non-hedging or hedging instruments.	N/A
4	Provide disclosures for the objectives for holding or issuing derivatives, the context needed to understand these objectives, as well as strategies for achieving these objectives (FASB ASC 815-10-50-1A).	N/A
5	Provide disclosures for the volume of derivative activity (FASB ASC 815-10-50-1B).	N/A
6	Provide disclosures on the location of fair value amounts of derivative instruments (both assets and liabilities, respectively) on the Balance Sheet (FASB ASC 815-10-50-4A).	N/A
7	Provide disclosures on the location of gains or losses recognized into earnings (FASB ASC 815-10-50-4A).	N/A
8	Provide the effective portion of gains and losses, by contract type, on derivative instruments classified as either cashflow or net investment hedges that are being reclassified into earnings during the current period (FASB ASC 815-10-50-4C).	N/A
9	Provide the effective portion of gains and losses, by contract type, on derivative instruments classified as either cashflow or net investment hedges that are recognized in other comprehensive income during the current period (FASB ASC 815-10-50-4C).	N/A
10	Provide the portion of gains and losses, by contract type, on derivative instruments classified as either cashflow or net investment hedges that represent the amount of the hedges? ineffectiveness or the amount, if any, excluded from the assessment of the hedge effectiveness (FASB ASC 815-10-50-4C).	N/A
11	Provide a description of the nature of trading activities for non-hedge designated derivative instruments and related risks, including how the entity manages those risks. Explain the use of any alertnative disclosures for trading activities, if applicable (FASB ASC 815-10-50-4F).	N/A
12	Provide a description on the existence and nature of credit-risk related contingent features and the circumstances in which the features could be triggered in derivative instruments that are in a net liability position at the end of the reporting period. Include disclosures related to posted collateral, as well as additional collateral required and fair value of assets needed to settle the instrument immediately if the credit-risk contingent features were triggered (FASB ASC 815-10-50-7).	N/A
13	Provide disclosures of the entity?s accouting policy to offset or not offset derivative asset and liability positions on the Balance Sheet under a master netting agreement. Describe the accounting policy to offset cash collateral positions arising from derivative instrument(s) under a master netting agreement against net derivative positions (FASB ASC 815-10-50- 8).	N/A
14	Disclose amounts recognized for the right to reclaim cash collateral or the obligation to return	N/A

Line 1	Question Provide the nature of the insurance contingencies, including the range of loss.	Answer See Note 31 Part 3.A There is no range of losses to report because there are no insurance contingencies that are reasonably possible.
2	Provide the nature of the litigation contingencies, including the range of loss for probably liabilities (SFFAS No. 5, par. 39).	See Note 31 Part 3.A There is no range of losses to report because there are no litigation contingencies that are probable liabilities.
3	Provide the nature of the litigation contingencies including the range of loss for reasonably possible contingenies (SFFAS No. 5, par. 40-41).	See Note 31 Part 3.A A number of cases was filed in the U.S. Court of Federal Claims alleging that the U.S. government violated statutory and regulatory mandates to make proper payments to plaintiffs under ARRA, Section 1603, for having placed certain energy properties into service. The total alleged damages for these cases approximate \$273 million. A case was filed in the U.S. District Court for the Eastern District of Pennsylvania in which the plaintiffs, after voluntarily surrendering ten 1933 Double Eagle gold coins they had in their possession, requested either the return of the coins, or compensation by the government of \$40 million. The U.S. government contends the coins should not have been in the plaintiffs' possession as they are considered public property of the U.S. government.
4	Provide the total claim amount for cases assessed as "unable to determine" if significant. Also, provide a statement on whether this materiality affects the financial statements.	See Note 31 Part 3.A
5	Describe the other claims that may derive from treaties or international agreements.	The Department does not have any treaties or international agreements to report for fiscal year 2015.
6	Provide any other relevant information pertaining to this note. At a minimum, describe briefly the significant accounting policies pertaining to this note.	See Note 31 Part 3.A

# **NOTE 31 - SIGNIFICANT ACCOUNTING INFORMATION**

# **PART 1. BASIS OF PRESENTATION**

The *Government Management Reform Act of 1994* (GMRA) (Pub. L. No. 103-356), which requires the Secretary of the Treasury (Secretary) to prepare and submit annual audited financial statement of the executive branch, amended the *Budget and Accounting Procedures Act of 1950*, which allows the Secretary to stipulate the format and requirements of executive agencies to furnish financial and operational information to the President and Congress. The Secretary developed guidance in the U.S. Department of the Treasury's Treasury Financial Manual (TFM) Volume 1, Part 2, Chapter 4700 to provide agencies with instructions to meet the requirements of GMRA. The TFM Chapter 4700 requires agencies to:

- Reclassify all items and amounts on the audited consolidated, department-level balance sheet, statement of net cost, changes in net position/income statement, and the statement or note on custodial activity, if applicable to the Department's Closing Package financial statements (hereinafter referred to in this note as the "financial statements").
- 2. Disclose financial statement line item amounts identified as Federal by trading partner and amount (amounts should be the net of intra-bureau and intra-departmental eliminations).
- 3. Disclose notes required by the financial statement line items and other notes required in the *Financial Report of the U.S. Government* (FR); and
- 4. Disclose other data not contained in the primary FR financial statements and notes required to meet requirements of the U.S. generally accepted accounting principles.

The TFM Chapter 4700 requires agencies to use the Government-wide Financial Report System (GFRS) to input the above information in the following GFRS Modules:

- 1. Closing Package Financial Statement Report (GF003F)
  - a. Closing Package Financial Statement Report Balance Sheet (Balance Sheet)
  - b. Closing Package Financial Statement Report Statement of Net Cost (Statement of Net Cost)
  - c. Closing Package Financial Statement Report Statement of Changes in Net Position (Statement of Changes in Net Position)
- 2. Trading Partner Summary Note Report (GF004F)
- 3. Closing Package Line Reclassification Summary Report (GF003G)
- 4. FR Notes Report (GF006)
- 5. Other Data Report (GF007)

The financial statements are based on the U.S. Standard General Ledger (USSGL) crosswalk to the FR financial statements and notes.

# PART 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### **A. REPORTING ENTITY**

The accompanying financial statements include the operations of the U.S. Department of the Treasury (Department or Treasury), one of 24 CFO Act agencies of the Executive Branch of the U.S. government, and certain custodial activities the Department manages on behalf of the entire U.S. government. The following paragraphs describe the activities of the reporting entity.

The Department was established by an Act of Congress approved on September 2, 1789. Many subsequent acts affected the development of the Department, delegating new duties to its charge and establishing the numerous bureaus and divisions that now comprise the Department. As a major policy advisor to the President, the Secretary of the Treasury (Secretary) has primary responsibility for formulating and managing the domestic and international tax and financial policies of the U.S. government.

Further, the Secretary is responsible for recommending and implementing U.S. domestic and international economic and fiscal policy; governing the fiscal operations of the U.S. government; maintaining foreign assets control; managing the federal debt; collecting income and excise taxes; representing the United States on international monetary, trade, and investment issues; overseeing Departmental overseas operations; and directing the manufacture of coins, currency, and other products for customer agencies and the public.

The Department's reporting entities include Departmental Offices (DO) and seven operating bureaus. For financial reporting purposes, DO is composed of: Community Development Financial Institutions (CDFI) Fund, Office of D.C. Pensions (ODCP), Exchange Stabilization Fund (ESF), Federal Financing Bank (FFB), Government Sponsored Enterprises (GSE) Program, International Assistance Programs (IAP), Office of Financial Research (OFR), Office of Financial Stability (OFS), Office of Inspector General (OIG), Small Business Lending Fund (SBLF), Special Office of Inspector General for the Troubled Asset Relief Program (SIGTARP), Treasury Forfeiture Fund (TFF), Treasury Inspector General for Tax Administration (TIGTA), and the DO policy offices.

The Department's seven operating bureaus are: Bureau of Engraving and Printing (BEP); Bureau of the Fiscal Service (Fiscal Service); Financial Crimes Enforcement Network (FinCEN); Internal Revenue Service (IRS); United States Mint (Mint); Office of the Comptroller of the Currency (OCC); and Alcohol and Tobacco Tax and Trade Bureau (TTB). The Department's financial statements reflect the reporting of its own entity activities, comprising both the Department's operating bureaus and DO that are consolidated with the Department. This includes appropriations received to conduct its operations and revenue generated from those operations. They also reflect the reporting of certain custodial functions it performs on behalf of the U.S. government and others. Activities include collecting certain federal revenue, servicing the federal debt, disbursing certain federal funds, and maintaining certain assets and liabilities for the U.S. government, as well as for other federal entities. The Department's reporting entity does not include the General Fund of the U.S. government (General Fund), which maintains receipt, disbursement, and appropriation accounts for all federal agencies.

Following generally accepted accounting principles (GAAP) for federal entities, the Department does not consolidate into its financial statements the assets, liabilities, or results of operations of any financial organization or commercial entity in which it holds either a direct or indirect majority equity investment, unless they constitute a part of the reporting entity per GAAP. Even though some of the equity investments are significant, these entities meet the criteria of "bailed out" entities under paragraph 50 of Statement of Federal Financial Accounting Concepts (SFFAC)

No. 2, *Entity and Display*, which directs that such "bailout" investments should not be consolidated into the FR, either in part or as a whole.

### **B. BASIS OF ACCOUNTING AND PRESENTATION**

The financial statements have been prepared from the accounting records of the Department in conformity with GAAP for federal entities, and the Office of Management and Budget (OMB) Circular No. A-136, *Financial Reporting Requirements,* as revised. Accounting principles generally accepted for federal entities are the standards prescribed by the Federal Accounting Standards Advisory Board (FASAB). FASAB is recognized by the American Institute of Certified Public Accountants as the official accounting standards-setting body for the U.S. government.

Transactions and balances among the Department's entities have been eliminated from the Balance Sheet, the Statement of Net Cost, and the Statement of Changes in Net Position.

While these financial statements have been prepared from the accounting records of the Department in accordance with the formats prescribed by Treasury, these financial statements are in addition to the financial reports used to monitor and control budgetary resources which are prepared from the same accounting records.

Federal assets and liabilities are those due from or to other federal entities. Federal earned revenues are collections or accruals of revenue from other federal entities, and Federal costs are payments or accruals of expenditures to other federal entities.

The financial statements should be read with the realization that the Department is a component of the U.S. government, a sovereign entity and, accordingly, its liabilities not covered by budgetary resources cannot be liquidated without the legislative enactment of an appropriation, and that the payment of all liabilities other than for contracts can be abrogated by the sovereign entity. Liabilities represent the probable and measurable future outflow or other sacrifice of resources as a result of past transactions or events. Liabilities covered by budgetary resources are those liabilities for which Congress has appropriated funds or funding is otherwise available to pay amounts due. Liabilities not covered by budgetary or other resources represent amounts owed in excess of available, congressionally appropriated funds or other amounts, and there is no certainty that the appropriations will be enacted.

Certain fiscal year 2014 activity and balances presented on the financial statements have been reclassified to conform to the presentation in the current year, the effects of which are immaterial.

### C. FUND BALANCE WITH TREASURY

The Fund Balance with Treasury is the aggregate amount of the Department's accounts with the U.S. government's central accounts from which the Department is authorized to make expenditures and pay liabilities. It is an asset because it represents the Department's claim to the U.S. government's resources. Fund balance with Treasury is not equivalent to unexpended appropriations because it also includes non-appropriated revolving and enterprise funds, suspense accounts, and custodial funds such as deposit funds, special funds, and trust funds.

### D. FEDERAL LOANS RECEIVABLE AND FEDERAL INTEREST RECEIVABLE

Federal loans and interest receivable from other federal agencies represent the principal and related interest receivable on loans issued by the Department, through FFB. No loan loss allowance or credit reform subsidy costs are recorded for loans purchased from federal agencies or for guaranteed loans made to non-federal borrowers because the outstanding balances (interest and principal) are guaranteed by those agencies.

Federal loans and interest receivable from other federal agencies represent the principal and related interest receivable on loans issued by the Department, through the Fiscal Service. The Department acts as an intermediary issuing these loans because the agencies receiving these loans lend these funds to third parties to carry out various programs of the U.S. government. Because of the Department's intermediary role in issuing these loans, the Department does not record a loan loss allowance related to these Federal loans. Instead, loan loss allowances and subsidy costs are recognized by the ultimate lender, the federal agency that issued the loans to the public. Interest revenue on Federal loans is accrued when earned.

### E. ADVANCES TO THE UNEMPLOYMENT TRUST FUND

Advances are issued to the Department of Labor's (DOL) Unemployment Trust Fund from the General Fund for states to pay unemployment benefits. The Fiscal Service accounts for the advances issued on behalf of the General Fund. As outlined in the United States Code (USC) 42 USC §1323, these advances bear an interest rate that is computed as the average interest rate as of the end of the calendar month preceding the issuance date of the advance for all interest-bearing obligations of the United States that form the public debt, to the nearest lower 1/8 of 1.0 percent. Interest on the advances is due on September 30th of each year. Advances are repaid when the Secretary, in consultation with the Secretary of the DOL, determines that the balance in the Unemployment Trust Fund is adequate to allow repayment. Advances to the Unemployment Trust Fund are reported as part of Federal Loans Receivable and Federal Interest Receivable on the Balance Sheet.

### F. CASH AND OTHER MONETARY ASSETS

Substantially all of the Department's operating cash is government-wide cash held in depository institutions and Federal Reserve Bank (FRB) accounts. Agencies deposit funds that are submitted to them directly into either a Federal Reserve Treasury General Account (TGA) or a local TGA depositary. The balances in these TGA accounts are transferred into the Federal Reserve Bank of New York's (FRBNY) TGA throughout the day.

Operating cash of the U.S. government represents balances from tax collections, customs duties, other revenue, federal debt receipts, and other various receipts, net of cash outflows for budget outlays and other payments held in the FRBs and in foreign and domestic financial institutions. Outstanding checks net against operating cash until they clear the Federal Reserve System.

The FRBNY maintains the TGA, which functions as the U.S. government's checking account for deposits and disbursements of public funds. Cash in the TGA is restricted for government-wide operations.

The Department's foreign currency investments having original maturities of three months or less are classified as cash equivalents. Special Drawing Rights (SDRs) holdings comprise most of the other monetary assets (refer to the accounting policy below entitled "Special Drawing Rights").

### G. ACCOUNTS AND TAXES RECEIVABLE

Federal taxes receivable are not accrued until related tax returns are filed or assessments are made by the IRS and agreed to by either the taxpayer or the court. Additionally, the prepayments are netted against liabilities. Accruals are made to reflect penalties and interest on taxes receivable through the balance sheet date.

Taxes receivable consist of unpaid assessments (taxes and associated penalties and interest) due from taxpayers. The existence of a receivable is supported by a taxpayer agreement, such as filing of a tax return without sufficient

payment, or a court ruling in favor of the IRS. An allowance for doubtful accounts is recorded to reflect an estimate of the portion of total taxes receivable deemed to be uncollectible.

Compliance assessments are unpaid assessments which neither the taxpayer nor a court has affirmed the taxpayer owes to the U.S. government. Examples include assessments resulting from an IRS audit or examination in which the taxpayer does not agree with the results. Compliance assessment write-offs consist of unpaid assessments for which the IRS does not expect further collections due to factors such as taxpayers' bankruptcy, insolvency, or death. Compliance assessments and related write-offs are not reported on the balance sheet. Statutory provisions require the accounts to be maintained until the statute for collection expires.

#### H. CREDIT PROGRAM RECEIVABLES, NET

The Department accounts for all of its credit program receivables under the provisions of credit reform accounting pursuant to the Federal Credit Reform Act (FCRA). Credit programs include loans or equity securities associated with the Department's state and local Housing Finance Agency (HFA) initiative programs, SBLF program, CDFI programs, and certain portions of the Department's participation in the IMF, and the Troubled Asset Relief Program (TARP). These programs are reported as part of Loans Receivable, Net on the Balance Sheet.

To account for the Department's credit program receivables, the Department applies the accounting provisions of Statement of Federal Financial Accounting Standards (SFFAS) No. 2, *Accounting for Direct Loans and Loan Guarantees,* as amended. SFFAS No. 2, as amended, which was promulgated as a result of FCRA, requires measurement of the asset or liability at the net present value of the estimated future cash flows. The cash flow estimates for each credit program transaction reflect the actual structure of the instruments. For each of these instruments, the Department estimates cash inflows and outflows related to the program over the estimated term of the instrument. Further, each cash-flow estimate reflects the specific terms and conditions of the program, technical assumptions regarding the underlying assets, risk of default or other losses, and other factors as appropriate. The measurement of assets within these programs is primarily derived from inputs which generally represent market data and, when such data is not available, management's best estimate of how a market participant would assess the risk inherent in the asset.

The primary purpose of the FCRA is to measure the cost of federal credit programs, and to place the cost of such credit programs on a basis equivalent with other federal spending. FCRA requires that the ultimate costs of a credit program be calculated and the budgetary resources be obtained before incurring the direct loan obligations. To accomplish this, the Department first predicts or estimates the future performance of direct and guaranteed loans when preparing its annual budget. The data used for these budgetary estimates are re-estimated at the fiscal year-end to reflect changes in actual loan performance and actual interest rates in effect when the loans were issued. The re-estimated data reflect adjustments for market risks, asset performance, and other key variables and economic factors. The re-estimated data is then used to report the cost of the loans disbursed under the direct or guaranteed loan program in the Department's Statement of Net Cost.

Cash flows associated with the Department's credit programs generally include disbursements, repayments, repurchases, fees, recoveries, interest, dividends, proceeds from sales of instruments, borrowings from Treasury, negative subsidy, and the subsidy cost received from the program accounts. Security-level data and assumptions used as the basis for cash flow model forecasts and program performance are drawn from widely available market sources,

as well as information published by investees. Key inputs and assumptions to the cash flow forecasts include, but are not limited to:

- Security characteristics such as unpaid principal balance, coupon rate, weighted-average loan age, issued bond balance, credit rating, maturity date, sinking fund schedules, principal and interest payment schedules, priority of payments, and performance of underlying collateral
- Discount rate, Market Adjusted Discount Rate (MRADR), and SDR exchange rate
- Department actions, as well as changes in legislation
- · Forecast dividend payments, late payments, prepayment rates and default rates
- Expected escrow conversion and return rates
- Default and recovery reports published by Moody's and Standard and Poor's
- Other third-party market sources

The recorded subsidy cost associated with each of the Department's credit programs represents the difference between the Department's projected costs of the program and the future cash flows anticipated to be received by the Department. The subsidy allowance specifically takes into consideration projected repayments and defaults and the projected cost of borrowings. The allowance is amortized to reflect the difference between projected and actual financing costs.

The Department's actions, as well as changes in legislation, may impact estimated future cash flows and related subsidy costs. The cost or cost savings of a modification is recognized in subsidy costs when the terms of a program are modified. Workouts are actions taken to maximize repayments of existing credit programs, and the expected effects on cash flows are included in the original estimate and re-estimates of the subsidy cost. Subsidy costs are also impacted by re-estimates which may occur as a result of updates to the original program subsidy cost estimates to reflect actual cash flows experience, as well as changes in forecasts of estimated future cash flows associated with the credit program.

#### **I. INVESTMENTS**

#### **Investment in GSEs**

The Department holds senior preferred stock and warrants for the purchase of common stock of two GSEs, the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac). These investment holdings are presented at their fair value. Changes in the valuation of these investments are recorded as exchange transactions on the Statement of Net Cost. Dividends related to these investments are also recorded as exchange transactions, and accrued when declared.

The GSE Senior Preferred Stock Purchase Agreements (SPSPAs), entered into by the Department with each GSE when the GSEs were placed under conservatorship, require the Department to increase its investment in the GSEs' senior preferred stock if, at the end of any quarter, the Federal Housing Finance Agency (FHFA), acting as the conservator, determines that the liabilities of either GSE exceed its respective assets. As funding to the GSEs to pay their excess liabilities is appropriated directly to the Department, such payments, as needed, are reported as expenses within the Department's Statement of Net Cost. These payments also result in an increase to the investment in the GSEs' senior preferred stock, with a corresponding increase in Liability to the General Fund for Custodial and Other Non-Entity Assets as the Department holds the investment on behalf of the General Fund.

#### **Investments in International Financial Institutions**

The Department, on behalf of the United States, invests in Multilateral Development Banks (MDBs) to support poverty reduction, private sector development, transitions to market economies, and sustainable economic growth and development, thereby advancing U.S. economic, political, and commercial interests abroad. As a participating member country, the Department, on behalf of the United States, provides a portion of the capital base of the MDBs, through subscriptions to capital, which allows the MDBs to issue loans at market-based rates to middle-income developing countries. These paid-in capital investments are non-marketable equity investments valued at cost on the Balance Sheet.

In addition, the Department, on behalf of the United States, contributes funding to MDBs to finance grants and extend credit to poor countries at below market-based interest rates. These U.S. contributions, also referred to as "concessional window" contributions, are reported as an expense on the Statement of Net Cost. Investments in International Financial Institutions are reported as part of Other Assets on the Balance Sheet.

#### **Other Investments and Related Interest**

The ESF holds most of the Department's foreign currency investments. The ESF's other foreign currency denominated assets and investment securities are available-for-sale securities recorded at fair value. These holdings are normally invested in interest-bearing securities issued or held through foreign governments or monetary authorities. Interest on investments, amortization of premiums, and accretion of discounts are recognized on an accrual basis. Premiums and discounts are amortized or accreted over the life of the related investment security as an adjustment to yield using the effective interest method. Other Investments and Related Interest are reported as part of the Debt and Equity Securities on the Balance Sheet.

### J. PROPERTY, PLANT, AND EQUIPMENT

#### General

Property, plant, and equipment (PP&E) is composed of capital assets used in providing goods or services. It also includes assets acquired through capital leases, which are initially recorded at the amount recognized as a liability for the capital lease at its inception. PP&E is stated at full cost, including costs related to acquisition, delivery, and installation, less accumulated depreciation. Major alterations and renovations, including leasehold and land improvements, are capitalized, while maintenance and repair costs are charged to expense as incurred. Costs for construction projects are recorded as construction-in-progress until completed, and are valued at actual (direct) cost plus applied overhead and other indirect costs.

Internal-use software encompasses software design, development, and testing of projects adding significant new functionality and long-term benefits. Costs for developing internal-use software are accumulated in work-indevelopment until a project is placed into service and testing and final acceptances are successfully completed. Once completed, the costs are transferred to depreciable property.

The Department leases land and buildings from the General Services Administration (GSA) to conduct most of its operations. Such leases do not meet capital lease requirements for financial reporting purposes. GSA charges a standard level user fee which approximates commercial rental rates for similar properties.

The Department's bureaus are diverse both in size and in operating environment. Accordingly, the Department's capitalization policy provides minimum capitalization thresholds which generally range from \$25,000 to \$50,000 for all property categories except for internal-use software. Minimum capitalization thresholds for internal-use software

generally range from \$50,000 to \$250,000 (except for IRS which generally range from \$10 million to \$50 million). The Department also uses a capitalization threshold for bulk purchases which generally ranges from \$50,000 to \$500,000 for non-manufacturing bureaus, and \$25,000 to \$50,000 for manufacturing bureaus. Bureaus determine the individual items that comprise bulk purchases based on Departmental guidance.

Depreciation is expensed on a straight-line basis over the estimated useful life of the asset with the exception of leasehold improvements and capital leases. Leasehold improvements are depreciated over the term of the lease or the useful life of the improvement, whichever is shorter. Capital leases are depreciated over the estimated life of the asset or term of the lease, whichever is shorter. Service life ranges (2 to 50 years) are wide due to the Department's diversity of PP&E. Land and land improvements, construction-in-progress, and internal-use software in development are not depreciated. The Department records impairment costs related to a significant and permanent decline in the service utility of general PP&E and construction-in-progress in the period incurred.

#### **Heritage Assets**

Heritage assets are assets of historical significance. Multi-use heritage assets are those heritage assets for which the predominant use is general government operations. All acquisition, reconstruction, and betterment costs for the Treasury multi-use heritage asset buildings are capitalized as general PP&E and depreciated over their service life.

#### K. FEDERAL DEBT AND INTEREST PAYABLE

Debt and associated interest are reported on the accrual basis of accounting. Interest costs are accrued as expense when incurred and are reported on the Statement of Net Cost. Certain Treasury securities are issued at a discount or premium. These discounts and premiums are amortized over the term of the security using an interest method for all long-term securities and the straight-line method for short-term securities.

#### L. COMMITMENTS AND CONTINGENCIES

The Department, through FFB, makes loan commitments with federal agencies, or private sector borrowers whose loans are guaranteed by federal agencies, to extend credit for their own use (refer to the accounting policy above entitled "*Federal Loans Receivable and Federal Interest Receivable*"). The Department establishes loan commitments when the Department and other parties fully execute promissory notes in which the Department becomes obligated to issue such loans immediately or at some future date. The Department reduces loan commitments when it issues the loans or when the commitments expire. Most obligations of the Department give a borrower the contractual right to a loan or loans immediately or at some point in the future within an agreed upon timeframe.

The Department, on behalf of the United States, subscribes to capital for certain MDBs, portions of which are capital commitments which are callable under certain limited circumstances to meet the obligations of the respective MDB. The capital commitments become binding on the United States when the Department issues instruments of subscription stating its intention to subscribe to the U.S. portion of callable capital, subject to the amounts provided for in appropriations acts. Additionally the Department, on behalf of the United States, participates in the IMF through certain borrowing arrangements that supplement IMF resources.

In accordance with SFFAS No. 5, *Accounting for Liabilities of the Federal Government*, the Department recognizes material contingent liabilities when the following criteria are met:

• A past event or exchange transaction has occurred

- A future cash outflow is probable
- A future cash outflow is measurable

The estimated liability recorded by the Department is either a specific amount or within a range of amounts. If some amount within the range is a better estimate than any other amount within the range, that amount is recognized. If no amount within the range is a better estimate than any other amount, the minimum amount in the range is recognized, and the range and a description of the nature of the contingency are disclosed. The Department follows this policy in recording a contingent liability, if any, related to the GSE SPSPA program and loss contingencies that may arise from claims, assessments, litigations, fines, penalties, and other sources.

If one or more, but not all, of the above criteria for recognition are met, and there is a reasonable possibility of loss, the Department will disclose, if material, the nature of the contingent liability, along with a range of possible loss, if estimable, and a description of the nature of the contingency.

#### **M. SPECIAL DRAWING RIGHTS**

The SDR is an international reserve asset created by the IMF to supplement its member countries' official reserves. Under its Articles of Agreement, the IMF may allocate SDRs to member countries in proportion to their IMF quotas. Pursuant to the *Special Drawing Rights Act of 1968*, as amended, the ESF holds all SDRs allocated to or otherwise acquired by the United States.

#### **Allocations and Holdings**

The Department records the SDR holdings as part of "Cash and Other Monetary Assets," and the liability for IMF SDR allocations as part of "Other Liabilities" on the Balance Sheet. The liabilities represent the amount that is payable in the event of liquidation of, or withdrawal by the United States from, the SDR department of the IMF or cancellation of the SDRs.

SDR holdings increase primarily as a result of IMF SDR allocations. SDR transactions are recorded as incurred. They include acquisitions and sales of SDRs, interest received on SDR holdings, interest charges on SDRs allocations, and valuation adjustments. The U.S. government receives remuneration in SDRs from the IMF based on claims on the IMF as represented by the U.S. Reserve Position. The remuneration is credited to the ESF which transfers to either the TGA or a specified financing account an equivalent amount of dollars plus nominal interest. The allocations and holdings are revalued monthly based on the SDR valuation rate as calculated by the IMF, resulting in the recognition of unrealized gains or losses on revaluation that are reported on the Statement of Net Cost.

#### **Certificates Issued to the Federal Reserve**

The *Special Drawing Rights Act of 1968* authorizes the Secretary to issue certificates, not to exceed the value of SDR holdings, to the FRB in return for dollar amounts equal to the face value of certificates issued. The certificates may be issued to finance the acquisition of SDRs from other countries or to provide U.S. dollar resources to finance other ESF operations. Certificates issued are redeemed by the Department at such times and in such amounts as the Secretary may determine, and do not bear interest. Certificates issued to the FRB are reported at their face value which approximates their carrying value since, under the terms of the agreement, there is no set repayment date and no interest accrued while certificates remain outstanding. The certificates issued are reported as part of Other Liabilities on the Balance Sheet.

#### **N. REFUNDS PAYABLE**

Refunds payable arise in the normal course of tax administration when it is determined that taxpayers have paid more than the actual taxes they owe. Amounts that the Department has concluded to be valid refunds owed to taxpayers are recorded as a liability which is reported as part of Non-Federal Accounts Payable on the Balance Sheet.

#### **O. FEDERAL EMPLOYEE BENEFITS PAYABLE – FECA ACTUARIAL LIABILITY**

The *Federal Employees' Compensation Act* (FECA) provides income and medical cost protection to covered federal civilian employees injured on the job, and employees who have incurred a work-related injury or occupational disease. The FECA program is administered by the DOL which pays valid claims and subsequently seeks reimbursements from the Department for these paid claims. Generally, the Department reimburses the DOL within two to three years once funds are appropriated. The FECA liability consists of two components. The first component is based on actual claims paid by the DOL but not yet reimbursed by the Department. The second component is the estimated liability for future workers compensation as a result of past events. Both components are reported as part of Federal Employee and Veteran Benefits Payable on the Balance Sheet. These future workers' compensation estimates are generated by applying actuarial procedures developed to estimate the liability for FECA benefits. The actuarial liability estimates for FECA benefits include the expected liability for death, disability, medical, and miscellaneous costs for approved compensation cases.

#### P. ANNUAL, SICK, AND OTHER LEAVE

Annual and compensatory leave earned by the Department's employees, but not yet used, is reported as an accrued liability. The accrued balance is adjusted annually to reflect current pay rates. Any portion of the accrued leave for which funding is not available is recorded as an unfunded liability as reported in Other Liabilities on the Balance Sheet. Sick and other leave are expensed as taken, and the Department does not record a liability for such amounts because employees do not vest in sick and other leave benefits.

#### Q. PENSION COSTS, OTHER RETIREMENT BENEFITS, AND OTHER POST-EMPLOYMENT BENEFITS

#### Federal Pension Costs, Other Retirement Benefits, and Other Post-Employment Benefits

The Department recognizes the full costs of its employees' pension benefits, including recognizing imputed costs for the difference between the estimated service cost and the contributions made by the Department. However, the assets and liabilities associated with these benefits are recognized by the Office of Personnel Management (OPM) rather than the Department.

Most employees of the Department hired prior to January 1, 1984, participate in the Civil Service Retirement System (CSRS), and employees hired between January 1, 1984 and December 31, 1986 are covered under the CSRS Offset System, to which the Department contributes 7.0 percent and 7.5 percent of pay for regular and law enforcement employees, respectively. On January 1, 1987, the Federal Employees' Retirement System (FERS) went into effect pursuant to Public Law (P.L.) 99-335. FERS is a three-tiered retirement system consisting of a Basic Benefit Plan, Thrift Savings Plan (TSP), and Social Security Benefits. Employees hired after December 31, 1986 are automatically covered by FERS and Social Security. For the FERS Basic Benefit Plan, the Department contributes between 11.1 percent and 13.2 percent for regular employees, and between 26.5 percent and 28.8 percent for law enforcement officers. The TSP under FERS is a 401(k)-type savings plan in which the Department automatically contributes one percent of base pay and matches any employee contributions up to an additional four percent of base pay. For most

employees hired after December 31, 1983, the Department also contributes the employer's matching share for Social Security.

Similar to federal retirement plans, OPM, rather than the Department, reports the assets and liability for future payments to retired employees who participate in the Federal Employees Health Benefits Program (FEHBP) and Federal Employees Group Life Insurance (FEGLI) Program. The Department reports the full cost of providing other retirement benefits (ORB). The Department also recognizes an expense and a liability for other post-employment benefits (OPEB), which includes all types of benefits, provided to former or inactive (but not retired) employees, their beneficiaries, and covered dependents. Additionally, one of the Department's bureaus, OCC, separately sponsors a defined life insurance benefit plan for current and retired employees, and is the administrator for a private defined benefit retirement plan, the Pentegra Defined Benefit Plan (PDBP), that provides certain health and life insurance benefits for certain of its retired employees who meet eligibility requirements. The OCC also separately sponsors a 401(k) plan in addition to the TSP.

### **District of Columbia Federal Pensions and Judicial Retirement Plans**

Pursuant to Title XI of the *Balanced Budget Act of 1997*, as amended, the Department became responsible for certain District of Columbia (D.C.) retirement plans. The actuarial cost method used to determine costs and actuarial liability for the retirement plans is the Individual Entry Age Normal Funding Method, which approximates the methodology specified by the Aggregate Entry Age Normal Actuarial Cost Method. The actuarial liability is based upon long-term economic assumptions. The pension benefit costs incurred by the plans are included on the Statement of Net Cost.

The economic assumptions used for the D.C. Federal Pensions and Judicial retirement plans differ from those used by the OPM for the following reasons: *(i)* the annual rate of salary increase assumptions are based on different plan member experience; *(ii)* the annual rate of inflation and cost-of-living adjustment assumptions are based on different statutory requirements (applicable Consumer Price Index and period of calculation); and *(iii)* for the annual rate of investment return assumption, OPM and the D.C. Federal Pensions and Judicial retirement plans use the same underlying yield curve but, unlike the D.C. Federal Pension Funds, OPM converts to a single equivalent rate.

#### **R. REVENUE AND FINANCING SOURCES**

The Department's activities are financed either through exchange revenue it receives from others or through nonexchange revenue and financing sources (such as appropriations provided by the Congress and penalties, fines, and certain user fees collected). User fees primarily include collections from the public for the IRS costs to process installment agreements and accompanying photocopy and reproduction charges. Exchange revenues are recognized when earned; i.e., goods are delivered or services are rendered. Revenue from reimbursable agreements is recognized when the services are provided. Non-exchange revenues are recorded when received or accrued when the Department has a legal claim through the respective collecting bureau. Appropriations used are recognized as financing sources when related expenses are incurred or assets are purchased.

The Department also incurs certain costs that are paid in total or in part by other federal entities, such as pension costs, the FEHBP, and any un-reimbursed payments made from the Treasury Judgment Fund on behalf of the Department. These subsidized costs are recognized on the Statement of Net Cost, and the imputed financing for these costs is recognized on the Statement of Changes in Net Position. As a result, there is no effect on net position. Other non-exchange financing sources, such as donations and transfers of assets without reimbursements, are also recognized for the period in which they occurred on the Statement of Changes in Net Position.

The Department recognizes revenue it receives from disposition of forfeited property as non-exchange revenue on the Statement of Changes in Net Position. The costs related to the Forfeiture Fund program are reported on the Statement of Net Cost. The Treasury Forfeiture Fund is the special fund account for depositing non-tax forfeiture proceeds received pursuant to laws enforced or administered by law enforcement bureaus that participate in the Treasury Forfeiture Fund. Forfeited property balances are reported in Other Assets on the Balance Sheet.

### S. CUSTODIAL REVENUES AND COLLECTIONS

Custodial revenues and collections include cash collected by the Department, primarily from taxes. These revenues are reported as Non-Federal, Non-Exchange Revenue on the Statement of Changes in Net Position. It does not include revenue collected by other federal agencies, such as user fees and other receipts, which are remitted for general operating purposes of the U.S. government or are dedicated for certain trust funds. The Statement of Changes in Net Position is presented on the "modified accrual basis." The Department recognizes revenues as cash is collected, and records a "non-cash accrual adjustment" representing the net increase or decrease during the reporting period in net revenue-related assets and liabilities, mainly taxes receivable.

#### T. PERMANENT AND INDEFINITE APPROPRIATIONS

Permanent and indefinite appropriations are used to disburse tax refunds, income tax credits, and child tax credits. Refund payment funding is recognized as appropriations are used. Permanent indefinite authority for refund activity is available for an unlimited period of time in the amount necessary to cover the refund and/or credit. Tax refunds and credits are reported as a custodial activity of the Department, since they are, in substance, a custodial revenuerelated activity resulting from taxpayer overpayments of their tax liabilities.

The Department also has two permanent and indefinite appropriations related to debt activity. One is used to pay interest on the public debt securities; the other is used to redeem securities that are matured, called, or eligible for early redemption. These accounts are not annual appropriations and do not have refunds. Debt redemption appropriations are related to the Department's liability and are reported on the Balance Sheet. Interest appropriations are recorded at the beginning of the fiscal year and again at mid-year, if necessary, and any unused authority is returned to the General Fund at the end of the fiscal year. Permanent indefinite authority for debt redemptions and related interest is available for an unlimited period of time.

The Department also has permanent and indefinite appropriations to fund increases in the projected subsidy costs of credit programs as determined by the re-estimation process required by the FCRA. The Department's renewable energy project is also covered by permanent indefinite appropriations.

Additionally, the Department has other permanent and indefinite appropriations to make certain payments on behalf of the U.S. government. These appropriations are provided to make payments to the FRB for fiscal services provided, and to the financial institutions for services provided as financial agents of the U.S. government. They also include appropriations provided to make other disbursements on behalf of the U.S. government, including payments made to various parties as a result of certain claims and judgments rendered against the United States.

#### **U. INCOME TAXES**

As an agency of the U.S. government, the Department is exempt from all income taxes imposed by any governing body, whether it is a federal, state, commonwealth, local, or foreign government.

#### V. USE OF ESTIMATES

The Department has made certain estimates and assumptions relating to the reporting of assets, liabilities, revenues, expenses, and the disclosure of contingent liabilities to prepare its financial statements. Actual results may differ from these estimates. It is possible that the results of operations, cash flows and/or the financial position of the Department may be materially affected in future periods by adverse changes in the outlook for the key assumptions underlying management's estimates. Transactions subject to estimates principally include loan and credit program receivables, credit reform subsidy costs, investments in GSEs and other non-federal securities and related impairment, tax receivables, loan guarantees, depreciation, imputed costs, actuarial liabilities, cost and earned revenue allocations, as well as contingencies and any related recognized liabilities. The following is a discussion of certain significant transactions subject to estimation.

The Department accounts for all of its credit program receivables in accordance with credit reform accounting (refer to the accounting policy above entitled "*Credit Program Receivables, Net*"). These receivables are derived using credit reform modeling which is subject to the use of estimates and forecasts that have inherent uncertainty. The Department recognizes the sensitivity of credit reform modeling to slight changes in certain model assumptions such as general economic conditions, specific stock price volatility of the entities in which the Department has an equity interest, estimates of expected default, and prepayment rates.

The Department uses regular review of model factors, statistical modeling, and annual re-estimates to reflect the most accurate cost of the credit programs to the U.S. government. The purpose of re-estimates is to update original program subsidy cost estimates to reflect actual cash flow experience as well as changes in forecasts of future cash flows. Forecasts of future cash flows are updated based on actual program performance to date, additional information about the portfolio, additional publicly available relevant historical market data on securities performance, revised expectations for future economic conditions, and enhancements to cash flow projection methods.

The Department performs annual calculations, as of September 30, to assess its need for recording an estimated liability in accordance with SFFAS No. 5 related to the Department's funding commitment to the GSEs under the SPSPAs. Liability recognition is predicated on the probable future occurrence of an excess of liabilities and minimum capital reserve amounts, as defined, over the assets of either GSE at the end of any reporting quarter. The occurrence of future GSE deficits, which ultimately determines the Department's liability to the GSEs, is most sensitive to future changes in the housing price index, and to a lesser extent, future changes in guarantee fees received by the GSEs on single family mortgages.

The annual valuation performed as of September 30 on the preferred stock and warrants comprising the Investments in Government Sponsored Enterprises line item on the Balance Sheet incorporates various forecasts, projections and cash flow analyses to develop an estimate of the asset's fair value. The primary input into the investment valuation for the senior preferred stock is the present value of the projected quarterly dividend payments, and a key input for the warrants is the market value of the shares of common stock of the GSEs which are traded on the over-the-counter (OTC) Bulletin Board. The Department evaluates the need for adjusting its OTC market-based valuation of the warrants for the effects, if any, of significant events occurring after the close of the market but before the end of the measurement date. Any changes in valuation, including impairment, are recorded and disclosed in accordance with SFFAS No. 7, *Accounting for Revenue and Other Financing Sources.* Since the valuation is an annual process, the change in valuation of the preferred stock and warrants are deemed usual and recurring.

Estimation of such complex and long-duration receivables, investments, and contingencies is subject to uncertainty. It is possible that new developments will adversely impact the value of receivables, investments, and contingencies, as well as ultimate amounts required to be funded by the Department. Except as expressly noted herein, the Department has not revalued or included in its estimates as of September 30, 2015 the effects of any new developments that may have occurred subsequent to September 30, 2015. Refer to the accounting policy Q above for additional discussion related to the estimation of actuarial liabilities.

#### W. OTHER-THAN-TEMPORARY IMPAIRMENTS

A decline in the market value (either due to credit, price or currency) of any investment below cost that is deemed to be other-than-temporary is accounted for as an impairment, and the carrying value is reduced to fair value for financial reporting purposes. To determine whether an impairment is other-than-temporary, the Department considers whether it has the ability and intent to hold the investment until a market price recovery, and considers whether evidence indicating the cost of the investment is recoverable outweighs evidence to the contrary.

#### X. CREDIT, MARKET AND FOREIGN CURRENCY RISK

Credit risk is the potential, no matter how remote, for financial loss from a failure of a borrower or counterparty to perform in accordance with underlying contractual obligations. The Department takes on possible credit risk when it makes direct loans or guarantees to non-federal entities, provides credits to foreign entities, or becomes exposed to institutions which engage in financial transactions with foreign countries. The following programs of the Department entail credit risk: monetary assets held; committed but undisbursed direct loans; funding commitment to the GSEs; GSE obligations obtained under the HFA initiative (the New Issue Bond Program); investments, loans, and other credit programs including the CDFI Fund programs, SBLF, TARP, and certain portions of the Department's participation in the IMF.

The Department's activities generally focus on the underlying problems in the credit markets. These programs were developed to provide credit where borrowers are not able to get access to credit with reasonable terms and conditions. Because these programs attempt to correct for a market imperfection, it can expose the Department to potential costs and losses. Additional risk of costs and losses could result from terrorist attacks under the Terrorism Risk Insurance Program. The extent of the risk assumed by the Department is described in more detail in Part 3 (C, G, and I) of this note and, where applicable, is factored into credit reform models and reflected in fair value measurements.

For Emergency Economic Stabilization Act (EESA) programs, the statute requires that budgetary costs of the troubled assets and guarantees of troubled assets be calculated by adjusting the discount rate for market risks. The Department's cost estimates for the TARP programs are adjusted based on a MRADR to reflect the additional return required by the market to compensate for variability around the expected losses reflected in the cash flows. Under SFFAS No. 2, including market risk in the cash flow estimates is consistent with the type of assets being valued. The inclusion of the MRADR is the mechanism for deriving a fair value of the assets. As directed by Congress, a MRADR is also used in the credit reform model for certain portions of the Department's participation in the IMF.

The Department faces certain risks and uncertainties as a result of holding securities denominated in foreign currency. The price of holdings of such securities may widely fluctuate as a result of volatility in foreign currency markets and changes in real and perceived credit risk of the Department's counterparties.

### Y. FUNDS FROM DEDICATED COLLECTIONS

The Department accounts for revenues and other financing sources for funds from dedicated collections (FDC) separately from other funds. Such funds are financed by specifically identified revenues provided to the U.S. government by non-federal sources, often supplemented by federal and other financing sources, which remain available over time. These specifically identified revenues and other financing sources are required by statute to be used for designated activities, benefits, or purposes. The Department applies the following criteria for purposes of designating funds as dedicated collections: *(i)* a statute committing the U.S. government to use specifically identified revenues and/or other financing sources that are originally provided to the U.S. government by a non-federal source only for designated activities, benefits, or purposes; *(ii)* explicit authority for the fund to retain revenues and/or other financing sources not used in the current period for future use to finance the designated activities, benefits, or purposes; *(iii)* a requirement to account for and report on the receipt, use, and retention of the revenues and/or other financing sources that distinguishes the fund from the U.S. government's general revenues; and (iv) for funds comprised of both federal and non-federal sources, such funding is predominantly non-federal, or the non-federal funding is material to the Department's financial statements.

#### **Z. ALLOCATION TRANSFERS**

The Department is a party to allocation transfers with other federal agencies as both a transferring (parent) entity and/or a receiving (child) entity. Allocation transfers are legal delegations by one department of its authority to obligate budget authority and outlay funds to another department. A separate fund account (allocation account) is created in the U.S. Treasury as a subset of the parent fund account for tracking and reporting purposes. All allocation transfers of balances are credited to this account, and subsequent obligations and outlays incurred by the child entity are charged to this allocation account as they execute the delegated activity on behalf of the parent. Parent federal agencies report both the proprietary and budgetary activity and the child agency does not report any financial activity related to budget authority allocated from the parent federal agency to the child federal agency. However, OMB guidance requires the child to report the activity when the Department receives allocation transfers, as the child, from the Executive Office of the President (See Circular No.A-136, II.4.2, question 5, for three exceptions).

The Department allocates funds, as the parent, to the Department of Energy and Department of Health and Human Services (HHS). Also, the Department receives allocation transfers, as the child, from the Agency for International Development, HHS, Department of Transportation, Executive Office of the President, and General Services Administration.

#### **AA. FIDUCIARY ACTIVITIES**

Fiduciary activities are the collection or receipt, and the management, protection, accounting, investment, and disposition by the U.S. government of cash or other assets in which non-Federal individuals or entities have an ownership interest that the U.S. government must uphold. Fiduciary cash and other assets are not assets of the U.S. government.

#### **AB. RELATED PARTIES AND OTHER ENTITIES**

The primary "related parties" with whom the Department conducts business are other federal agencies, mainly through the normal lending activities of the Fiscal Service and the FFB. These activities are disclosed in the financial statements. Additionally, the Secretary serves on the Federal Housing Finance Oversight Board, and consults with the Director of FHFA on matters involving Fannie Mae and Freddie Mac. This provides the Department an advisory

role in the FHFA's actions as the conservator for Fannie Mae and Freddie Mac. The Department has no transactions with FHFA, but rather transacts directly with the GSEs. The Department also utilizes the services of the FRBs to execute a variety of transactions on behalf of the Fiscal Service and the ESF. Due to the magnitude and variety of services provided, the following provides an overview of the FRBs' purpose, governance, and the various services provided on behalf of the Department.

#### **Federal Reserve System**

The Federal Reserve System (FR System) was created by Congress under the *Federal Reserve Act of 1913.* The FR System consists of the Federal Reserve Board of Governors (Board), the Federal Open Market Committee (FOMC), and the FRBs. Collectively, the FR System serves as the nation's central bank and is responsible for formulating and conducting monetary policy, issuing and distributing currency (Federal Reserve Notes), supervising and regulating financial institutions, providing nationwide payments systems (including large-dollar transfers of funds, automated clearinghouse (ACH) operations, and check collection), providing certain financial services to federal agencies and fiscal principals, and serving as the U.S. government's bank. Monetary policy includes actions undertaken by the FR System that influence the availability and cost of money and credit as a means of helping to promote national economic goals. The FR System also conducts operations in foreign markets in order to counter disorderly conditions in exchange markets or to meet other needs specified by the FOMC to carry out its central bank responsibilities. The FR System is not included in the federal budget. It is considered an independent central bank, and its decisions are not ratified by the executive branch of the U.S. government.

The Department interacts with the FRBs in a variety of ways, including the following:

- The FRBs serve as the Department's fiscal agent and depositary, executing banking and other financial transactions on the Department's behalf. The Department reimburses the FRBs for these services, the cost of which is included on the Statement of Net Costs
- The FRBs hold Treasury and other federal securities in the FRBs' System Open Market Account (SOMA) for the purpose of conducting monetary policy
- The FRBs hold gold certificates issued by the Department in which the certificates are collateralized by gold
- The FRBs hold SDR certificates issued by the Department which are collateralized by SDRs
- The FRBs are required by Board policy to transfer their excess earnings to the Department on behalf of the U.S. government

The Department also consults with the FR System on matters affecting the economy and certain financial stability activities. The above financial activities involving the Department are accounted for and disclosed in the Department's financial statements. In accordance with SFFAC No. 2, *Entity and Display*, the FR Systems' assets, liabilities, and operations are not consolidated into the Department's financial statements.

#### Federal Reserve System Structure

The Board is an independent organization governed by seven members who are appointed by the President and confirmed by the Senate. The full term of a Board member is 14 years, and the appointments are staggered so that one term expires on January 31 of each even-numbered year. The Board has a number of supervisory and regulatory responsibilities for institutions including, among others, state-chartered banks that are members of the FR System, bank holding companies, and savings and loan holding companies. In addition, the Board has general supervisory responsibilities for the 12 FRBs, and issues currency (Federal Reserve Notes) to the FRBs for distribution.

The FOMC is comprised of the seven Board members and five of the 12 FRB presidents, and is charged with formulating and conducting monetary policy primarily through open market operations (the purchase and sale of certain securities in the open market), the principal tool of national monetary policy. These operations affect the amount of reserve balances available to depository institutions, thereby influencing overall monetary and credit conditions. The 12 FRBs are chartered under the Federal Reserve Act, which requires each member bank to own the capital stock of its FRB. Supervision and control of each FRB is exercised by a board of directors, of which three are appointed by the Board of Governors of the FR System, and six are elected by their member banks.

The FRBs participate in formulating and conducting monetary policy, distribute currency and coin, and serve as fiscal agents for the Department, other federal agencies and fiscal principals. Additionally, the FRBs provide short-term loans to depository institutions and loans to participants in programs or facilities with broad-based eligibility in unusual and crucial circumstances when approved by the Board.

#### **Federal Reserve System Assets and Liabilities**

The FRBs hold Treasury and other securities in the SOMA for the purpose of conducting monetary policy. Treasury securities held by the FRBs totaled \$1.8 trillion and \$1.9 trillion at September 30, 2015 and 2014, respectively. These assets are generally subject to the same market (principally interest-rate) and credit risks as other financial instruments. In the open market, the FR System purchases and sells Treasury securities as a mechanism for controlling the money supply.

The FRBs have deposit liabilities with Treasury and depository institutions. The FRBs issue Federal Reserve Notes, the circulating currency of the United States, which are collateralized by the Treasury securities and other assets held by the FRBs.

Financial and other information concerning the FR System, including financial statements for the Board and the FRBs, may be obtained at <u>http://www.federalreserve.gov</u>.

#### FRB Residual Earnings Transferred to the Department

FRBs generate income from interest earned on securities, reimbursable services provided to federal agencies, and the provision of priced services to depository institutions as specified by the *Monetary Control Act of 1980*. Although the FRBs generate earnings from carrying out open market operations, via the earnings on securities held in the SOMA account, their execution of these operations is for the purpose of accomplishing monetary policy rather than generating earnings. Each FRB is required by Board policy to transfer to the Department its residual (or excess) earnings after providing for the cost of operations, payment of dividends, and reservation of an amount necessary to equate surplus with paid-in capital. These residual earnings may vary due to, among other things, changes in the SOMA balance levels that may occur in conducting monetary policy. In the event of losses, or a substantial increase in capital, an FRB will suspend its payments to the U.S. Treasury until such losses or increases in capital are recovered through subsequent earnings. The FRB residual earnings of \$96.5 billion and \$99.2 billion for fiscal years ended September 30, 2015 and 2014, respectively, are reported as part of Other Taxes and Receipts on the Statement of Changes in Net Position. They constituted 2.8 percent and 3.1 percent of the Department's total custodial revenues collected in fiscal years 2015 and 2014, respectively. "Taxes, Interest and Other Receivables, Net" includes a receivable for FRB's residual earnings which represents the earnings due to the U.S. Treasury as of September 30, but not collected by the U.S. Treasury until after the end of the month.

# PART 3. OTHER NOTES TO THE CLOSING PACKAGE FINANCIAL

# **STATEMENTS**

# (THE INFORMATION PROVIDED IN THIS SECTION IS DERIVED FROM THE DEPARTMENT'S AGENCY FINANCIAL REPORT FINANCIAL STATEMENT FOOTNOTES.)

#### A. FR NOTES REPORT NOTE 18 - CONTINGENCIES (TEXT DATA)

#### **LEGAL CONTINGENCIES**

The Department is a party in various administrative proceedings, legal actions, and claims, which may ultimately result in settlements or decisions adverse to the U.S. government. These contingent liabilities arise in the normal course of operations and their ultimate disposition is unknown. The Department discloses contingent liabilities where the conditions for liability recognition have not been met and the likelihood of unfavorable outcome is more than remote. The Department does not accrue for possible losses related to cases where the potential loss cannot be estimated or the likelihood of an unfavorable outcome is less than probable.

In some cases, a portion of any loss that may occur may be paid by the Department's Judgment Fund, which is separate from the operating resources of the Department. For cases related to the *Contract Disputes Act of 1978* and awards under federal anti-discrimination and whistle-blower protection acts, the Department must reimburse the Judgment Fund from future appropriations.

In the opinion of the Department's management and legal counsel, based on information available as of the date of this report, the expected outcome of other legal actions, individually or in the aggregate, will not have a materially adverse effect on the Department's financial statements, except for the pending legal actions described below which may have a materially adverse impact on the financial statements depending on the outcomes of the cases.

#### **Pending Legal Actions**

- *Tribal Trust Fund Cases:* Numerous cases have been filed in the U.S. District Courts in which Native American Tribes seek a declaration that the United States has not provided the tribes with a full and complete accounting of their trust funds, and seek an order requiring the U.S. government to provide such an accounting. In addition, there are a number of other related cases seeking damages in the U.S. Court of Federal Claims, which do not name the Department as a defendant. The U.S. government is currently in discussion with counsel representing most of the remaining plaintiff tribes with tribal trust fund cases pending against the United States about the feasibility of an out-of-court settlement. Plaintiff tribes in several of the pending cases have chosen to pursue active litigation, rather than settlement discussion, and the U.S. government is litigating those cases vigorously. The Department is unable to determine the likelihood of an unfavorable outcome or an estimate of potential loss at this time.
- *GSE Related Cases:* A number of cases were filed in the U.S. Court of Federal Claims, the U.S. District Court for the District of Columbia, the U.S. District Court for the Northern District of Iowa, the U.S. District Court for the District of Delaware, and the U.S. District for the Eastern District of Kentucky, in which the plaintiffs allege, among other things, that the U.S. government took their property and contractual rights as preferred and common stockholders when the third amendments to the SPSPAs between the Department and each GSE were executed in August 2012. One case also alleges that the U.S. government took plaintiffs' property and contractual rights when the GSEs were placed into conservatorship and entered into the SPSPAs with the Department in September 2008. In the Court of Federal Claims, the plaintiffs seek just compensation (damages) from the U.S. government. In the

District Courts, the plaintiffs seek to set aside the third amendments to the SPSPAs as well as damages. On September 30, 2014, the D.C. District Court granted the defendants' motions to dismiss four cases pending in that court, and the plaintiffs filed appeals in October 2014. The Department is unable to determine the likelihood of an unfavorable outcome or an estimate of potential loss at this time.

- *Starr International Co., Inc. v. United States:* The plaintiff, an American International Group, Inc. (AIG) shareholder that brought suit on behalf of two classes of shareholders, alleges that the U.S. government violated the Fifth Amendment to the United States Constitution by illegally exacting or taking property without just compensation. One class, the Credit Agreement Class, claimed that the Fifth Amendment was violated when a majority share of AIG's equity and voting rights was conveyed in connection with an \$85 billion loan to AIG during the 2008 financial crisis. Starr also asserted a Fifth Amendment violation on behalf of the second class, the Reverse Stock Split Shareholder Class, alleging that a June 2009 reverse stock split constituted a taking of the common stockholders' asserted right to a shareholder vote on whether to approve a reverse split of AIG's common stock. The U.S. Court of Federal Claims held that the Credit Agreement Shareholder Class prevails on liability, but recovers no damages, and that the Reverse Stock Split Shareholder Class have appealed. The Department is unable to determine the likelihood of an unfavorable outcome or make an estimate of potential loss at this time.
- *Estes v. United States:* The State of Kansas filed a complaint in the U.S. Court of Federal Claims requesting the Department to redeem matured savings bonds not possessed by Kansas, but which have registered owners with last known addresses in Kansas. The Department informed the State of Kansas that it would not redeem these savings bonds since it was not the registered owner of the bonds. The U.S. government filed a motion to dismiss the complaint. On August 20, 2015, the court dismissed one claim in the complaint and denied the U.S. government's motion with respect to other claims. The Department is unable to determine the likelihood of an unfavorable outcome or an estimate of potential loss at this time.
- *Adam Steele, Brittany Montrois v. United States:* The plaintiffs filed a class claim in the U.S. District Court for the District of Columbia seeking refunds of all user fees paid, plus interest, to obtain a preparer tax identification number (PTIN). Additionally, the plaintiffs seek to force the Department to cease charging a user fee to obtain a PTIN and asking for more information than is necessary to issue a PTIN. The Department is unable to determine the likelihood of an unfavorable outcome or an estimate of potential loss at this time.
- Anonymous Whistleblower v. United States: A whistleblower case was filed in the U.S. Tax Court under seal. The anonymous claimant allegedly provided confidential information about tax fraud committed by multiple other taxpayers to the IRS. Having been denied a whistleblower award, the claimant has filed a claim in the U.S. Tax Court. The case is currently being held in abeyance until the Court determines the scope and standard of review it will follow. The Department is unable to determine the likelihood of an unfavorable outcome or an estimate of potential loss at this time.
- American Recovery and Reinvestment Tax Act of 2009 (ARRA) Related Cases: A number of cases was filed in the U.S. Court of Federal Claims alleging that the U.S. government violated statutory and regulatory mandates to make proper payments to plaintiffs under ARRA, Section 1603, for having placed certain energy properties into service. The Department has determined there is a reasonably possible likelihood of unfavorable outcomes in some of the cases. The total alleged damages for these cases approximate \$273 million.

- Langbord v. U.S. Department of the Treasury: A case was filed in the U.S. District Court for the Eastern District of Pennsylvania in which the plaintiffs, after voluntarily surrendering ten 1933 Double Eagle gold coins they had in their possession, requested either the return of the coins, or compensation by the government of \$40 million. The U.S. government contends the coins should not have been in the plaintiffs' possession as they are considered public property of the U.S. government. The Department has determined there is a reasonably possible likelihood of an unfavorable outcome.
- *Other Legal Actions:* The Department also is involved in employment related legal actions (e.g., matters alleging discrimination and other claims before federal courts, the Equal Employment Opportunity Commission, and the Merit Systems Protection Board) for which an unfavorable outcome is reasonably possible, but for which an estimate of potential loss cannot be determined at this time. It is not expected that these cases will have a material adverse effect on the Department's financial position or results.

#### **OTHER CONTINGENCIES**

#### **Terrorism Risk Insurance Program**

The *Terrorism Risk Insurance Act* (TRIA), signed into law in November 2002, was originally enacted to address market disruptions resulting from terrorist attacks on September 11, 2001. Most recently, the Terrorism Risk Insurance Program Reauthorization Act of 2015 extended the Terrorism Risk Insurance Program (TRIA Program) until December 31, 2020. TRIA helps to ensure available and affordable commercial property and casualty insurance for terrorism risk, and simultaneously allows private markets to stabilize. The authority to pay claims under the TRIA Program is activated upon the certification of an "act of terrorism" by the Secretary in consultation with the Secretary U.S. Department of Homeland Security and the U.S. Attorney General. If a certified act of terrorism occurs, insurers may be eligible to receive reimbursement from the U.S. government for insured losses in connection with certified acts of terrorism resulting in more than \$100 million in insured losses once a particular insurer has also satisfied its designated deductible amount. Insured losses above this amount will be shared between insurance companies and the U.S. government. TRIA includes both mandatory and discretionary authority for the Department to recoup federal payments made under the TRIA Program through policyholder surcharges under certain circumstances, and contains provisions designed to manage litigation arising from or relating to a certified act of terrorism. There were no claims under TRIA as of September 30, 2015 or 2014.

#### **B.** FR NOTES REPORT NOTE 19 – COMMITMENTS (TEXT DATA)

#### **Loan Commitments**

The Department, through FFB, makes loan commitments with federal agencies, or private sector borrowers whose loans are guaranteed by federal agencies, to extend them credit for their own use (refer to Part 2.L). As of September 30, 2015 and 2014, the Department had loan commitments totaling \$14.6 billion and \$17.9 billion, respectively.

#### **Multilateral Development Banks**

The Department, on behalf of the United States, has subscribed to capital for certain MDBs, portions of which are callable under certain limited circumstances to meet the obligations of the respective MDB. There has never been, nor is there anticipated, a call on the U.S. commitment for these subscriptions.

#### **Exchange Stabilization Agreement**

The North American Framework Agreement (NAFA), signed by the Department in 1994, includes the Exchange Stabilization Agreement (ESA) with Mexico. The Department, through the ESF, has a standing swap line for \$3.0 billion with Mexico under the NAFA and its implementing ESA. The amounts and terms (including the assured source of repayment) of any borrowing under NAFA and ESA will have to be negotiated and agreed to before any actual drawing can occur. The ESA does provide sample clauses that state that transactions shall be exchange rate neutral for the ESF, and shall bear interest based on a then current rate tied to U.S. Treasury bills. There were no drawings outstanding on the ESF swap line as of September 30, 2015 and 2014.

#### New Arrangements to Borrow

The Supplemental Appropriations Act of 2009 (P.L. 111-32) provided the authorization and appropriation for an increase in the United States' participation in the New Arrangements to Borrow (NAB). Because the U.S. financial participation in the IMF is denominated in SDRs, P.L. 111-32 authorized and appropriated up to the dollar equivalent of SDR 75 billion to implement this commitment. Accordingly, the United States agreed to increase its participation in the NAB from SDR 6.6 billion to SDR 69.1 billion, pursuant to IMF Executive Board Decision No. 14577-(10/35). Total U.S. participation in the NAB of SDR 69.1 billion was equivalent to \$97.0 billion and \$102.4 billion as of September 30, 2015 and 2014, respectively. Refer to Note H of this section for more information on the NAB.

#### **Housing Programs Under TARP**

Housing programs under TARP are designed to provide stability for both the housing market and homeowners. These programs assist homeowners who are experiencing financial hardships to remain in their homes until their financial position improves or they relocate to a more sustainable living situation, and to obtain other assistance designed to prevent foreclosures. As of September 30, 2015 and 2014, the Department had committed up to \$37.5 billion and \$38.5 billion, respectively, for these programs. Outstanding commitments totaled \$19.0 billion and \$24.4 billion as of September 30, 2015 and 2014, respectively. For fiscal years 2015 and 2014, payments made on behalf of the housing programs under TARP totaled \$4.2 billion and \$4.3 billion, respectively, reported on the Statement of Net Cost.

#### **Commitment to GSEs**

The SPSPA agreements between the Department and each GSE, which have no expiration date, provide for the Department to disburse funds to the GSEs if, at the end of any quarter, the FHFA determines that the liabilities exceed its assets. At September 30, 2015 and 2014, the Department's maximum remaining potential commitment to the GSEs was \$258.1 billion. Refer to Note F for further information.

#### C. FR NOTES REPORT NOTE 22 – FUNDS FROM DEDICATED COLLECTIONS (TEXT DATA)

Pursuant to the legal authority found in Section 10 of the Gold Reserve Act of 1934, as amended, the ESF may purchase or sell foreign currencies, hold U.S. foreign exchange and SDR assets, and may provide financing to foreign governments and foreign entities. The ESF accounts for and reports its holdings to the Fiscal Service on the Standard Form 224, "Statement of Transactions," and provides other reports to Congress. Interest on SDRs in the IMF, investments in U.S. Treasury securities, and investments in foreign currency assets are ESF's primary sources of revenue. The ESF's earnings and realized gains on foreign currency assets represent inflows of resources to the government, and the interest revenues earned from U.S. Securities are the result of intra-Departmental flows. The BEP, Mint, OCC, and IRS operate "public enterprise/revolving funds" to account for their respective revenues and expenses. 31 USC § 5142 established the revolving fund for BEP to account for revenue and expenses related to the currency printing activities. P.L. 104-52 (31 USC § 5136) established the Public Enterprise Fund for the Mint to account for all revenue and expenses related to the production and sale of numismatic products and circulating coinage. Revenues and other financing sources at the Mint are mainly from the sale of numismatic and bullion products and the sale of circulating coins to the FRB system. These revenues represent inflows of resources to the government. 12 USC § 481 established the Assessment Funds for OCC. Revenue and financing sources are from the bank examinations and assessments for the oversight of the national banks, savings associations, and savings and loan holding companies. These non-appropriated funds contribute to the inflows of resources to the government to specifically fund these entities' operations. 26 USC § 7810 established the Federal Tax Lien Revolving Fund to account for revenue and expenses from the sale of property foreclosed upon by a holder of a lien. Such revenue represents inflows of resources to the federal government. There are minimal transactions with other government agencies.

There are other FDCs at several Treasury bureaus, such as donations to the Presidential Election Campaign Fund, gifts to reduce the public debt, and other enforcement related activities. Public laws and the U.S. Code established and authorized the use of these funds. Sources of revenues and other financing sources include contributions, cash and property forfeited in enforcement activities, and public donations, all which represent inflows to the government.

#### D. FR NOTES REPORT NOTE 26 - HERITAGE ASSETS (TEXT DATA)

The Department has a total of fifteen heritage assets, of which five are considered multi-use, for fiscal years 2015 and 2014. The Treasury Complex (Main Treasury Building and Annex), declared a national historical landmark in 1972, is treated as a multi-use heritage asset and is expected to be preserved indefinitely. The buildings that house the Mint in Denver, San Francisco, Fort Knox, and West Point are also considered multi-use heritage assets and included on the National Register of Historic Places. Additionally, the Mint maintains heritage assets consisting of four coin collections and six historical artifacts.

#### E. FR NOTES REPORT NOTE 27 - FIDUCIARY ACTIVITIES (TEXT DATA)

# F. FR Notes Report Note 28B – Financing and Housing Market Stabilization - Liabilities to Government Sponsored Enterprises (GSEs) (Text Data)

Congress established Fannie Mae and Freddie Mac as GSEs to support mortgage lending. A key function of the GSEs is to purchase mortgages, package those mortgages into securities, which are subsequently sold to investors, and guarantee the timely payment of principal and interest on these securities.

Leading up to the financial crisis, increasingly difficult conditions in the housing market challenged the soundness and profitability of the GSEs, thereby threatening to undermining the entire housing market. In response, Congress to pass the Housing and Economic Recovery Act (HERA) (P.L. 110-289) in July 2008. This act created FHFA, with enhanced regulatory authority over the GSEs, and provided the Secretary with certain authorities intended to ensure the financial stability of the GSEs, if necessary. In September 2008, FHFA placed the GSEs under conservatorship, and the Department invested in the GSEs by entering into a Senior Preferred Stock Purchase Agreement (SPSPA) with each GSE. These actions were taken to preserve the GSEs' assets, ensure a sound and solvent financial condition, and mitigate systemic risks that contributed to market instability. The purpose of such actions is to maintain the solvency of the GSEs so they can continue to fulfill their vital roles in the home mortgage market while the Administration and Congress determine what structural changes should be made to the housing finance system. Draws under the SPSPAs result in an increased investment in the GSEs as further discussed below.

Under the SPSPAs, the Department initially received from each GSE: *(i)* 1,000,000 shares of non-voting variable liquidation preference senior preferred stock with a liquidation preference value of \$1,000 per share, and *(ii)* a non-transferrable warrant for the purchase, at a nominal cost, of 79.9 percent of common stock on a fully-diluted basis. The warrants expire on September 7, 2028. Under the amended SPSPAs, the quarterly dividend payment changed from a 10.0 percent per annum fixed rate dividend on the total liquidation preference (as discussed below) to an amount equivalent to the GSE's positive net worth above a capital reserve amount. The capital reserve amount, which was initially set at \$3.0 billion for calendar year 2013, declined to \$2.4 billion on January 1, 2014, and \$1.8 billion on January 1, 2015, and will continue to decline by \$600 million at the beginning of each calendar year thereafter until it reaches zero by calendar year 2018. The GSEs will not pay a quarterly dividend if their positive net worth is below the required capital reserve threshold. Cash dividends of \$20.4 billion and \$72.5 billion were received during fiscal years ended September 30, 2015 and 2014, respectively. Dividends received in fiscal year 2014 were attributable, in part, to a federal income tax benefit that was recognized in the earnings of one GSE in fiscal year 2014.

The SPSPAs, which have no expiration date, provide for the Department to disburse funds to the GSEs if, at the end of any quarter, the FHFA determines that the liabilities of either GSE exceed its assets. Draws from the Department under the SPSPAs are designed to ensure that the GSEs maintain positive net worth, with a fixed maximum amount available to each GSE under this agreement, established as of December 31, 2012 (refer to the "Liabilities to GSEs" section below). Draws against the funding commitment of the SPSPAs do not result in the issuance of additional shares of senior preferred stock; instead, the liquidation preference of the initial 1,000,000 shares is increased by the amount of the draw. There were no payments to the GSEs for the fiscal years ended September 30, 2015 and 2014.

#### **ACCOUNTING TREATMENT**

If the Department estimates a contingent liability to the GSEs, this liability will be accrued and reported on the Balance Sheet and funded through the Department's direct appropriations. The liability accrual, if any, will be reflected at its gross amount as reported within Non-Federal Gross Cost on the Statement of Net Cost.

If actual payments are made to the GSEs, they will result in increases to the U.S. government's liquidation preference in the GSEs' senior preferred stock, and thus represent General Fund exchange revenue reported on the Statement of Net Cost as Non-Federal Earned Revenue. Changes in the fair valuation of the GSE preferred stock and common stock warrants, and related dividends received, are General Fund-related costs and revenues that are likewise reported as Non-Federal Earned Revenue.

#### SENIOR PREFERRED STOCK AND WARRANTS FOR COMMON STOCK

In determining the fair value of the senior preferred stock and warrants for common stock, the Department relied on the GSEs' public filings and press releases concerning their financial statements, as well as non-public, long-term financial forecasts, monthly summaries, quarterly credit supplements, independent research regarding preferred stock trading, independent research regarding the GSEs' common stock trading on the OTC Bulletin Board, discussions with each of the GSEs and FHFA, and other information pertinent to the valuations. Because of the nature of the instruments, which are not publicly traded and for which there is no comparable trading information available, the fair valuations rely on significant unobservable inputs that reflect assumptions about the expectations that market participants would use in pricing.

The fair value of the senior preferred stock considers the amount of forecasted dividend payments. The fair valuations assume that a hypothetical buyer would acquire the discounted dividend stream as of the transaction date. The fair value of the senior preferred stock increased as of September 30, 2015 when compared to September 30, 2014, primarily reflecting higher forecasted GSE earnings derived from guarantee fees, lower volatility and risk in the mortgage lending industry, and lower forecasted mortgage loan losses due to reduced credit risk assumed by the GSEs.

The fair value of the warrants is impacted by the nominal exercise price and the large number of potential exercise shares, the market trading of the common stock that underlies the warrants as of September 30, the principal market, and the market participants. Other factors impacting the fair value include, among other things, the holding period risk related directly to the assumption of the amount of time that it will take to sell the exercised shares without depressing the market. The fair value of the warrants increased at the end of fiscal year 2015 when compared to 2014 primarily due to increases in the market price of the underlying common stock of each GSE.

#### LIABILITIES TO GSES

As part of the annual process undertaken by the Department, a series of long-term financial forecasts are prepared to assess as of September 30, the likelihood and magnitude of future draws to be required by the GSEs under the SPSPAs within the forecast time horizon. The Department used 25-year financial forecasts prepared through year 2040 and 2039 in assessing if a contingent liability was required as of September 30, 2015 and 2014, respectively. If future payments under the SPSPAs are deemed to be probable within the forecast horizon, the Department will estimate and accrue a contingent liability to the GSEs to reflect the forecasted equity deficits of the GSEs. This accrued contingent liability will be undiscounted and will not take into account any of the offsetting dividends that could be received, as the dividends, if any, would be owed directly to the General Fund. Such recorded accruals will be adjusted in subsequent years as new information develops or circumstances change.

Based on its annual assessment, the Department estimated no probable future funding draws as of September 30, 2015 and 2014, and thereby accrued no contingent liability. At September 30, 2015 and 2014, the maximum remaining contractual commitment to the GSEs for the remaining life of the SPSPAs was \$258.1 billion.

In assessing the need for an estimated contingent liability, the Department relies on the GSEs' public filings and press releases concerning their financial statements, monthly summaries, and quarterly credit supplements, as well as non-public, long-term financial forecasts, the FHFA House Price Index, discussions with each of the GSEs and FHFA, and other information pertinent to the liability estimates. The forecasts prepared in assessing the need for an estimated contingent liability as of September 30, 2015 include three potential wind-down scenarios, with varying assumptions regarding the timing as to when new guaranteed mortgage-backed securities would cease being issued by the GSEs. The forecasts also assume a continued gradual wind-down of the retained portfolios (and corresponding net interest income) through 2018, as directed under the amended SPSPAs for each GSE to reduce the maximum balance of its retained mortgage portfolio by 15.0 percent per annum beginning December 31, 2013. The maximum balance of the GSEs' retained mortgage portfolio was initially set at \$650 billion as of December 31, 2012, and is required under the amended SPSPAs to be reduced to \$250 billion by December 31, 2018.

#### **ESTIMATION FACTORS**

The Department's forecasts concerning the GSEs may differ from actual experience. Estimated senior preferred values and future draw amounts will depend on numerous factors that are difficult to predict including, but not limited to, changes in government policy with respect to the GSEs, the business cycle, inflation, home prices,

unemployment rates, interest rates, changes in housing preferences, home financing alternatives, availability of debt financing, market rates of guarantee fees, outcomes of loan refinancings and modifications, new housing programs, and other applicable factors.

#### **REGULATORY ENVIRONMENT**

To date, Congress has not approved a plan to address the future of the GSEs, thus the GSEs continue to operate under the direction of their conservator, the FHFA, whose stated strategic goals for the GSEs are to: *(i)* maintain foreclosure prevention activities and credit availability to foster liquid, efficient, competitive, and resilient national housing finance markets; *(ii)* reduce taxpayer risk through increasing the role of private capital in the mortgage market; and *(iii)* build a new single-family securitization infrastructure.

The Temporary Payroll Tax Cut Continuation Act of 2011 was funded by an increase of ten basis points in the GSEs' guarantee fees (referred to as "the increased fees") which began in April 2012, and is effective through October 1, 2021. The increased fees are remitted to the Department and not retained by the GSEs. Accordingly, the increased fees do not affect the profitability of the GSEs. For fiscal years 2015 and 2014, the GSEs remitted to the Department the increased fees totaling \$2.4 billion and \$1.9 billion, respectively, which are reported within the line item entitled Other Taxes and Receipts on the Statement of Changes in Net Position.

#### G. FR NOTES REPORT NOTE 1 – DEBT ISSUANCE SUSPENSION PERIOD MEASURES (TEXT DATA)

Congress provided the Department with statutory authority to take certain extraordinary measures in the event that Treasury debt nears the statutory debt limit and a delay in raising the statutory debt limit occurs. These measures authorize the Department to deviate from its normal debt management operations and exercise legal authorities to avoid exceeding the statutory debt limit.

During the period of the delay in raising the statutory debt limit, the Department may undertake the following extraordinary measures: *(i)* suspend new issuances of Treasury debt securities to the Government Securities Investment Fund of the Federal Employees' Retirement System Thrift Savings Plan (TSP), the Civil Service Retirement and Disability Trust Fund (Civil Service Fund), the Postal Service Retiree Health Benefits Fund (Postal Benefits Fund), and the ESF as investments; *(ii)* redeem early a certain amount of Treasury debt securities held by the Civil Service Fund; (*iii*) suspend new issuances of State and Local Government Series (SLGS) securities; *(iv)* utilize FFB to exchange outstanding Treasury debt securities held by the Civil Service Fund for non-Treasury debt securities; and (*v*) issue cash management bills to manage short-term financing needs.

When the period of delay in raising the statutory debt limit ends, the Department discontinues its use of extraordinary measures and resumes its normal debt management operations. Furthermore, the Department is required by the relevant statutes, to restore the TSP, Civil Service Fund and Postal Benefits Fund with the accumulated principal balance of Treasury debt securities that bears such interest rates and maturity dates necessary to replicate the investments the funds would have held had the delay not occurred (the uninvested principal). The Department is also required by the relevant statutes, to pay these funds the related lost interest (forgone interest) on the uninvested principal. The Department is not required by statute to restore the ESF and state and local governments with uninvested principal or lost interest incurred during a period of delay.

A delay in raising the statutory debt limit occurred from May 20, 2013 through October 16, 2013. On October 17, 2013, Congress enacted the *Continuing Appropriations Act, 2014* (P.L. 113-46) which temporarily suspended the statutory debt limit through February 7, 2014. On February 8, 2014, in accordance with P.L. 113-46, the statutory

debt limit was raised to \$17.212 trillion, the amount of the qualifying federal debt securities outstanding on that date. A delay in raising the statutory debt limit also occurred from February 10, 2014 until February 15, 2014. On February 15, 2014, Congress enacted the *Temporary Debt Limit Extension Act* (P.L. 113-83) which temporarily suspended the debt limit through March 15, 2015. On March 16, 2015, in accordance with P.L. 113-83, the statutory debt limit was raised to \$18.113 trillion, the amount of the qualifying federal debt securities outstanding on that date. Another delay in raising the statutory debt limit occurred from March 16, 2015 until November 2, 2015. On November 2, 2015, Congress enacted the *Bipartisan Budget Act of 2015* (P.L. 114-74) which temporarily suspended the debt limit through March 15, 2017.

In fiscal year 2014, following the end of the delays in the debt limit raise that occurred in that year, the Department restored the funds involved in the extraordinary measures undertaken between May 20, 2013 and February 15, 2014 with uninvested principal and interest totaling \$364.7 billion and \$1.2 billion, respectively. Of the \$1.2 billion of forgone interest paid in fiscal year 2014, \$444 million was accrued and recorded as an expense on the Statement of Net Cost in fiscal year 2014.

The March 16, 2015 delay in raising the statutory debt limit did not end until November 2, 2015 and, as such, none of the uninvested principal and foregone interest payable as a result of the extraordinary measures had been restored to the TSP, Civil Service Fund or Postal Benefits Fund as of September 30, 2015. Accordingly, the Department recorded a liability as of September 30, 2015 totaling \$350.7 billion, comprised of uninvested principal owed to these three funds as of that date totaling \$348.6 billion and forgone interest payable to the funds for the period March 16, 2015 through September 30, 2015 totaling \$2.1 billion. This liability, coupled with an additional liability for the uninvested principal and foregone interest that was incurred during the remainder of the period of the delay from October 1, 2015 through November 2, 2015, was payable to the three funds following the end of the delay.

The liability for the uninvested principal and foregone interest payable as of September 30, 2015 was reported on the Balance Sheets as a liability, of which \$146.1 billion was reported in the line item, Federal Accounts Payable, which represented a Federal liability of the combined principal and interest payable to the Civil Service Fund and Postal Benefits Fund which are administered by the OPM (the OPM funds), and the remaining \$204.6 billion was reported in the line item, Non-Federal Other Liabilities, which represented the principal and interest payable to the TSP, a public liability. Corresponding amounts were reported as Other Assets on the Balance Sheets for the total \$350.7 billion of uninvested principal and foregone interest owed to the funds as of September 30, 2015. Additionally, the accrued forgone interest expense totaling \$2.1 billion was reported as an expense on the Statement of Net Cost, with an offsetting amount reported on the Statement of Changes in Net Position.

In addition to those activities previously discussed, other types of extraordinary measures were taken during the period of the delay, including temporarily suspending investments in Treasury debt securities by the ESF, temporarily suspending new issuances of SLGS securities, and utilization of FFB to redeem outstanding Treasury debt securities held by the Civil Service Fund. Extraordinary measures continued through November 2, 2015 when the delay in raising the debt limit ended and Congress enacted a law to temporarily suspend the debt limit. On November 2, 2015, the Department resumed normal debt management operations. On this date, the Department restored uninvested principal of \$204.8 billion to the TSP, and \$147.8 billion to the two OPM funds. The Department also restored foregone interest to the TSP on November 3, 2015 in the amount of \$1.7 billion. Foregone interest payable to the two OPM funds totaling \$978 million will be restored on the next semi-annual interest payment date of December 31,

2015. In addition, the Department authorized ESF and state and local governments to resume investments in Treasury debt securities.

#### H. FR NOTES REPORT NOTE 4A - DIRECT LOANS RECEIVABLE, NET (TEXT DATA)

The Department administers a number of programs designed to stabilize the nation's financial system and restore the flow of credit to consumers, businesses, and homeowners.

#### STATE AND LOCAL HOUSING FINANCE AGENCY (HFA) PROGRAM (GSE SPONSORED)

Under HERA, the Department, together with the FHFA, Fannie Mae, and Freddie Mac, created a program in October 2009 to provide support to HFAs. This program was designed to support low mortgage rates and expand resources for low- and middle- income borrowers to purchase or rent homes, making them more affordable over the long term. The HFA Program is comprised of: *(i)* the New Issue Bond Program (NIBP) and *(ii)* the Temporary Credit and Liquidity Program (TCLP) which ended in fiscal year 2015. As of September 30, 2015 and 2014, the HFA net credit program receivable of \$6.9 billion and \$7.6 billion, respectively, included a positive subsidy allowance of \$865 billion and \$1.1 billion, respectively, which reflects the Department's projection that the HFA program will result in a net cost to the Department after accounting for repayments, interest, and fees.

Under the terms of the NIBP, the Department purchased securities of Fannie Mae and Freddie Mac backed by new mortgage revenue bonds issued by HFAs. As of September 30, 2015 and 2014, the NIBP gross credit program receivable was \$7.8 billion and \$8.7 billion, respectively. The Department performed a financial statement reestimate of the NIBP program's cost as of September 30, 2015 and 2014. These re-estimates resulted in a downward re-estimate, or a decrease in the cost of the program, of \$17 million as of September 30, 2015, and an upward reestimate in fiscal year 2015 was primarily driven by higher than estimated principal collections, and a slightly higher prepayment curve used in the projection of future years' cash flows as a result of improved economic conditions. The upward re-estimate in fiscal year 2014 was primarily driven by lower forecasted prepayment rates that increased the cost of the program since HFA bonds carry a lower weighted average coupon than the funding cost of the program.

Under the terms of the TCLP, the Department purchased participation certificates issued by Fannie Mae and Freddie Mac, representing participating interests in credit and liquidity facilities that the GSEs provided to certain HFAs as part of the program. Fannie Mae and Freddie Mac provided replacement credit and liquidity facilities to HFAs to help reduce the costs of maintaining existing financing and relieve financial strains on the HFAs. As of September 30, 2014, the liquidity facilities covered \$851 million of single-family and multi-family variable-rate demand obligations. The Department agreed to support the GSE replacement credit and liquidity facilities by purchasing from the GSEs interests in certain HFA bonds in the event such bonds were tendered to the GSEs. During the course of the program, the participating HFAs replaced the credit and liquidity facilities provided by the GSEs with alternate facilities provided by private sector banks. In July 2015, the last participating HFA received alternative liquidity facilities from private sector banks, resulting in the closure of the TCLP. From inception through the closure of the program, none of the HFA bonds had been tendered to the GSEs and, accordingly, the Department had not disbursed any funds. As such, the Department did not perform September 30, 2015 or 2014 subsidy re-estimates for TCLP.

#### SMALL BUSINESS LENDING FUND PROGRAM

The *Small Business Jobs Act of 2010* (P.L. 111-240) created the SBLF program. Pursuant to the Act, the Department provided capital to qualified community banks, for purposes of encouraging bank lending to small businesses, by

purchasing qualifying non-cumulative preferred stock or equivalents in each bank. As an incentive to participating banks to increase lending to small businesses, the dividend rate a bank paid to the Department for SBLF funding was reduced as the bank's small business lending increased. For most banks, the initial dividend rate of 5.0 percent could be reduced to as low as 1.0 percent. The rates were then locked in for all participants based on third quarter 2013 lending. The program provides an incentive for banks to repay loans within 4 ½ years. For institutions that did not increase lending by the end of the first two years of the program, the rate increased to 7.0 percent, in March 2014. For those institutions that did increase lending, the rate will increase to 9.0 percent and 13.8 percent for C Corporation and S Corporation banks, respectively, remaining in the program, effective March 2016. The Department treats these purchases of capital as direct loans in accordance with the requirements of FCRA. The Department's authority to provide new capital to SBLF participants expired in September 2011 and, accordingly, there were no new capital disbursements since that date.

As of September 30, 2015 and 2014, SBLF's net credit program receivable was \$2.4 billion and \$3.2 billion, respectively. These amounts include a negative subsidy allowance of \$32 million, and a positive subsidy allowance of \$36 million at September 30, 2015 and 2014, respectively, which reflects the Department's projection that the SBLF program will result in net income to the Department in fiscal year 2015, and a net cost to the Department in fiscal year 2014.

The Department performed financial statement re-estimates of the program's cost as of September 30, 2015 and 2014 which resulted in a downward re-estimate, or a decrease in the cost of the program of \$42 million, and an upward re-estimate, or an increase in the cost of the program, of \$24 million, respectively. Both the 2015 and 2014 downward and upward re-estimates were driven by changes in performance assumptions, actual performance to-date, and actual program funding costs. The 2015 performance assumptions anticipate an overall income to the program due to the repurchase of SBLF securities by participating institutions earlier than anticipated, and lower projected defaults relative to previous estimates. The 2014 performance assumptions anticipated an overall cost to the program due to lower dividend rates, both actual and projected, paid by participating institutions relative to previously projected dividend rates.

#### **INTERNATIONAL MONETARY FUND PROGRAMS**

The *Supplemental Appropriations Act of 2009* authorized an increase in the U.S. quota in the IMF, as well as an increase in U.S. participation in the NAB, one of the IMF's supplemental borrowing arrangements. The legislation applied FCRA to both program increases and, thus, the program increases are treated as direct loans to the IMF. For U.S. budget and accounting purposes, there are effectively two portions of the IMF quota and NAB programs. As of September 30, 2015 and 2014, the U.S. quota in the IMF totaled \$59.1 billion and \$62.5 billion, respectively, and comprised a FCRA and non-FCRA portion of \$7.0 billion and \$52.1 billion, respectively, at September 30, 2015, and \$7.4 billion, respectively, at September 30, 2014. As of September 30, 2015 and 2014, the U.S. NAB arrangement with the IMF totaled \$97.0 billion and \$102.4 billion, respectively, and comprised a FCRA and non-FCRA portion of \$7.0 billion and \$102.4 billion, respectively, and \$9.8 billion, respectively, at September 30, 2014. These designations only affect the manner in which the Department accounts for the use and repayment of these funds. The U.S. commitments to the IMF are denominated in SDRs and, thus, the dollar amounts of these commitments fluctuate with the SDR valuation rate. The following is a discussion of the FCRA portions of both the U.S. quota and NAB programs.

#### **United States Quota in the IMF Program**

At September 30, 2015 and 2014, the Department reported a net credit program receivable of \$1.2 billion and \$1.8 billion, respectively, representing amounts disbursed under the FCRA portion of the U.S. quota's reserve position, net of a positive subsidy allowance of \$181 million and \$159 million, respectively. This positive subsidy reflects the Department's projection that the program will result in a net cost to the Department after accounting for repayments and net interest. During fiscal year 2015, the Department had repayments of \$651 million, resulting in net proceeds less than cost of \$74 million. The Department reported the remaining undisbursed FCRA portion of the U.S. quota totaling \$5.8 billion and \$5.5 billion at September 30, 2015 and 2014, respectively, as a letter of credit. The Department performed financial statement re-estimates of the program's cost as of September 30, 2015 and 2014. The re-estimates resulted in an increase in program costs (or an upward re-estimate) of \$92 million and \$59 million for fiscal years 2015 and 2014, respectively, primarily due to a fluctuation in the valuation of the SDR rate since the calculation of the prior fiscal year's re-estimate.

#### **New Arrangements To Borrow Program**

FCRA disbursements outstanding under the NAB for fiscal years ended 2015 and 2014 totaled a net credit program receivable of \$4.0 billion and \$4.2 billion, respectively. The program had a positive subsidy allowance of \$366 million and \$134 million as of September 30, 2015 and 2014, respectively.

The Department performed a financial statement re-estimate of the program's cost as of September 30, 2015 and 2014. These re-estimates resulted in an increase in the projected cost of the program (or an upward re-estimate) of \$232 million and \$145 million as of September 30, 2015 and 2014, respectively. The re-estimates are primarily driven by the fluctuation in the valuation of the SDR rate since the prior year's re-estimate.

#### **Troubled Asset Relief Program**

Through TARP, the Department made direct loans and equity investments, and entered into other credit programs. TARP's authority to make new commitments to purchase or guarantee troubled assets expired in October 2010. Since then, the Department has wound down substantially all of the various programs under TARP through recoveries of investments in the form of repayments, sales, dividends, interest, and other income. During 2015 and 2014, the Department sold its remaining equity investments held in support of the Automotive Industry Financing Program. As of September 30, 2015, TARP held investments in support of two remaining programs: the Capital Purchase Program (CPP) and the Community Development Capital Initiative (CDCI) program. The following discussion focuses on significant transactions that occurred for the programs administered by TARP during fiscal years 2015 and 2014.

The Department invested a total of \$16.3 billion in Ally Financial, Inc. (Ally) (formerly known as GMAC Inc.) between December 2008 and December 2009 to help support Ally's ability to originate new loans to automotive dealers and consumers, and to help address GMAC's capital needs. As a result of exchanges, conversions, warrant exercises, and sales since the Department's initial investment, the Department's remaining investment held in Ally as of September 30, 2013 consisted of 981,971 (pre-split) shares of Ally common stock (or 304.4 million common shares after considering a 310-for-1 Ally common stock split in April 2014), along with 119 million shares of Ally Series F-2 Mandatorily Convertible Preferred Securities. Between fiscal years 2015 and 2014, the Department sold all of the Ally common stock and Series F-2 preferred stock held. During fiscal year 2014, the Department sold 410,000 (pre-split) shares and 113 million (post-split) shares (or an aggregate equivalent of 240.1 million post-split shares) of Ally common stock for a total of \$5.8 billion in cash proceeds, resulting in net proceeds less than cost of \$1.4 billion. In fiscal year 2014, Ally also repurchased all of the Series F-2 preferred stock from the Department for \$5.2 billion, and

the Department received an additional \$725 million for the elimination of certain rights under an original agreement, resulting in net proceeds in excess of cost of \$300 million. During fiscal year 2015, the Department sold the remaining 64.1 million (post-split) shares of Ally common stock held for \$1.5 billion, resulting in net proceeds less than cost of \$290 million. The fair value of the remaining 64.1 million (post-split) shares of Ally common stock held by the Department at September 30, 2014 was \$1.5 billion, based on the New York Stock Exchange quoted market price.

In fiscal year 2009, the Department invested a total of \$51.0 billion in General Motors Company (GM) (formerly known as General Motors Corporation). Through various sales and restructurings of its investment, the Department's remaining investment held in GM as of September 30, 2013 consisted of 101 million shares of GM common stock which were sold in fiscal year 2014 for \$3.8 billion, resulting in net proceeds less than cost of \$639 million.

TARP implemented the CPP in fiscal year 2009 to help stabilize the financial system by providing capital to certain viable U.S. financial institutions. The CPP was designed to increase the capacity of those institutions to lend to businesses and consumers and support the economy. Under this program, the Department invested a total of \$204.9 billion in senior perpetual preferred stock, subordinated debentures, and common stock warrants, with a ten-year term, from qualifying U.S. controlled banks, savings associations, and certain bank and savings and loan holding companies. As a result of repayments and sales since this program's implementation, the Department had remaining CPP investments valued at \$99 million and \$281 million as of September 30, 2015 and 2014, respectively. In fiscal years 2015 and 2014, repayments and sales of CPP investments totaled \$197 million and \$1.5 billion, resulting in net proceeds less than cost of \$52 million and \$169 million in fiscal years 2015 and 2014, respectively.

To help unlock the flow of credit to consumers and small businesses in underserved communities, the Department created the CDCI program in fiscal year 2010 to provide additional low-cost capital in Community Development Financial Institutions (CDFIs). Under the terms of the program, the Department purchased senior preferred stock (or subordinated debt) from eligible CDFIs with an initial dividend rate of 2.0 percent that will increase to 9.0 percent after eight years. The Department invested a total of \$570 million in various institutions under the CDCI. As a result of repayments since this program's implementation, the Department had remaining CDCI investments valued at \$383 million and \$372 million as of September 30, 2015 and 2014, respectively. In fiscal years 2015 and 2014, the Department received \$19 million and \$10 million in repayments, respectively.

# PART 4. OTHER CLOSING PACKAGE MATTERS

The Department's reclassified financial statements and footnotes in the GFRS for FY 2015 and FY 2014 are presented in accordance with the TFM Reclassified Financial Statements crosswalks issued by Fiscal Service in September 2015 and September 2014, respectively (referred to as 2015 TFM Crosswalks and 2014 TFM Crosswalks, respectively). Due to updates in the 2015 TFM Crosswalks and additional reporting requirements for FY 2015, there are differences between the FY 2015 and FY 2014 presentation of certain account balances and activity on the reclassified financial statements and footnotes in the GFRS. Furthermore, the Department's reclassified financial statements for both FY 2015 and FY 2014 differ in presentation from certain of the presentation requirements that are incorporated in GFRS for FY 2015. These financial statement differences are detailed below.

#### **Balance Sheet**

• In FY 2015, the GFRS system inactivated the TARP Direct Loans and Equity Investments line 2.4 of the Balance Sheet and required current year TARP amounts to be reported on line 2.3 (Loan Receivable, Net).

Since line 2.4 is inactive in FY 2015 GFRS, the Department FY 2014 TARP Loan Receivable, Net balance is reported on line 2.3. This prior year presentation is required by GFRS to keep the balance sheet balanced. Additionally, FR Note 20 – Troubled Asset Relief Program (TARP) Direct Loans and Equity Investments was deleted in FY 2015. As such, the prior year TARP amounts have been reclassified into the new line item 'All PART Programs' within note 4A – Direct Loans Receivable, Net.

• In FY 2014, the GFRS system required total Net Position on the Reclassified Balance Sheet to be reported at the federal/non-federal indicator level (i.e. N/F/G/Z). However, this requirement was not explicitly stated in the September 2014 TFM Crosswalk. Accordingly, the Department's FY 2014 Reclassified Balance Sheet reports total Net Position, as segregated between Funds From Dedication Collection and Funds Other Than Those From Dedicated Collections, as "N" for FY 2014. This FY 2014 difference in presentation was approved by Fiscal Service staff. For FY 2015, the GFRS system required total Net Position on the Reclassified Balance Sheet to be reported as "N" as confirmed in the attached email.

RE Reclassification Re FW CPFS - of Financial Statemen Balance Sheet Preser

### **Statement of Changes in Net Position**

- The June 2015 TFM Crosswalks present USSGL account 310700, Unexpended Appropriations Used on Line 7.2, Appropriations Used in accordance with the FY 2015 published TFM. In FY 2014, this USSGL was reported on Line 7.1, Appropriations Received as Adjusted in accordance with the FY 2014 published TFM. Accordingly, the Department's Reclassified Statements of Changes in Net Position report USSGL account 310700 activity in Appropriations Used for FY 2015 and Appropriations Received as Adjusted for FY 2014.
- Treasury's Alcohol and Tobacco Tax Trade Bureau (TTB) collects Excise taxes for the Department of Interior's Fish and Wildlife Service TAS 014X5029003. In FY 2014, the Department reported the collections of custodial revenue on line 5.3 Excise Taxes and the disposition on line 8.4 *Non-Entity Collections Transferred to the General Fund*. In order to help facilitate proper elimination between Interior and Treasury at the government-wide level, the Department agreed to reclassify the disposition to line 7.8 *Expenditure transfers-out of financing sources (RC09)* to reciprocate Interior's recording on line 7.7 *Expenditure transfer-in of financing sources (RC 09)* starting FY 2015. The reporting for collections

remains the same (line 5.3). This reporting treatment is concurred by Fiscal Service and Interior. The change is made prospectively, which is confirmed with Fiscal Service staff.

#### **FR Notes**

The Department added the following disclosures effective for FY 2015 in accordance with the FY 2015 TFM. These TFM changes were prospective and therefore not presented for FY 2014.

- Section D 'Silver' was added to FR Note 02 Cash and Other Monetary Assets;
- Line 'Marketable Securities Treasury Floating Rate Notes' was added to FR Note 10A Federal Debt Securities Held by the Public and
- Two additional line item disclosures were added within FR Note 19 Commitments; 'Undelivered Orders Paid' within section C – Operating Leases and Undelivered Orders and section E 'Payments and Commitments for the Housing Program'.

Line	Question		Answer
9	Provide details reference to age PAR	regarding any loan modifications reported in Section G, including a cross- gency	Not applicable for Fiscal Years 2015 and 2014 because there were no loan modifications for those reporting periods.
			Fiscal year 2013 had one loan modification in the TARP Term Asset-Backed Securities Loan Facility. The \$55 million downward modification reflected principal and interest repayments occurring in February 2013, with contingent interest paid over time beginning in February 2013. Prior to the modification, principal, interest, and contingent interest would have occurred in March 2015.
10	modifications	her relevant information pertaining to this note.Provide details regarding any loan	See Other Text Data, Section A, Line 9 above
	reported in Sec	ction G, including a cross-reference to agency PAR.
